**January 2011**

Dear Colleague:

I am pleased to present the Winter/Spring 2011 Catalogue of Courses sponsored by Continuing Dental Education at The University of British Columbia. We are excited about our program, and hope you will take advantage of some of the excellent educational opportunities available.

Our on line registration software was upgraded last summer to meet the standards of PCI compliancy. The **Payment Card Industry Data Security Standard** (PCI DSS) is a worldwide information security standard defined by the Payment Card Industry Security Standards Council. The standard was created to help payment card industry organizations that process card payments prevent credit card fraud through increased controls around data and its exposure to compromise. The standard applies to all organizations that hold, process, or exchange cardholder information from any card branded with the logo of one of the card brands. CDE is confident that you will be reassured that all your credit card information is protected to the highest standards, while providing you the ease and access of registering for courses on line at your convenience through our safe and secure on line registration system.

Please be sure to mark in your calendar for **Adventure and Learn in Hawaii, February 2011**. Also in February we will be hosting the annual **Vernon Ski Seminar February 18 and 19, 2011**. Sure to be another great learning opportunity is **Cast Gold Restoration June 20-24, 2011**.

Our newsletter emails have been very well received this year. Please look for our new email design in the new year. If you would like to receive course reminders via email, please email [cde@interchange.ubc.ca](mailto:cde@interchange.ubc.ca) and we will add you to our list. If you have any suggestions or feedback for our program, we would also appreciate hearing from you at the same address!

I would like to thank our sponsors for their ongoing support, as their generosity enables us to continue to offer excellent programs throughout the year, and of course, those of you who continue to register for our courses.

On behalf of Continuing Dental Education, Best Wishes for Happy and Healthy New Year!

With kind regards,

Sylvia Stephens, Director  
Continuing Dental Education

**Please display this Catalogue in your office so that all members of your team have access to these continuing education opportunities.**

## GENERAL INFORMATION

### TO REGISTER:

**On-line:** Go to **www.dentistry.ubc.ca/cde** and click "To Register for a Course"

### By phone:

Local calls: 604.822.6156

Toll free 1.877.328.7744 (Canada & US)

### CREDITS

Continuing education credits for Dentists and Certified Dental Assistants are automatically forwarded to the College of Dental Surgeons of B.C.; and for Dental Technicians to the College of Dental Technicians of B.C. Registered Dental Hygienists are required to maintain their own records for submission; however, we include letters of attendance in the registration packages that are picked up at the registration desk on the day of each course. Upon request, we can provide records of attendance at UBC sponsored courses.

### BREAKS

For full day courses, beverages and light snacks are available upon arrival, and morning refreshment breaks and lunches are included. Refreshments and a light snack are provided for evening lectures.

### PARKING

Parking at UBC is available in the Health Sciences Visitors Parkade: weekend and evening (after 5 pm) flat rate \$6.00; or in B Lot: everyday flat rate \$6.00 (Mastercard and Visa accepted). Parkade parking during weekdays is available at \$1.75 per half hour up to a maximum of \$14.00 per day. Parking at the H.R. MacMillan Space Centre is pay parking.

### REFUND POLICY

Limited Enrolment Courses have individual refund/cancellation policies. Please refer to our website when registering or ask us at 604-822-6516.

For unlimited enrolment courses, registrants withdrawing 72 hours prior to the course date will be refunded less a \$50.00 administration fee. No refund will be granted for cancellations made less than 72 hours prior to the course date.

### DISCLAIMER

*Dental education institutions have an obligation to disseminate new knowledge related to dental practice. Some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by The University of British Columbia does not imply endorsement of a particular philosophy, procedure or product by The University of British Columbia.*

### ADA CERP

UBC Continuing Dental Education is an ADA CERP Recognized Provider.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at [www.ada.org/goto/cerp](http://www.ada.org/goto/cerp).

**Saturday, January 22, 2011**

**DE 9328**

## **Photography for Dental Professionals**

*Dr. Richard Simonsen*

**PROGRAM DESCRIPTION:** Dentists have a need to document their clinical work photographically from both a legal (defensive) aspect, and a self-interest or research aspect to develop a portfolio of their clinical work. This portfolio can be used to educate future patients, as well as form the basis for potential publications of case reports in peer-reviewed journals for the benefit of the profession. Richard Simonsen started his clinical photography in 1974 and his many years of experience will aid the novice or experienced clinical photographer. How to ethically modify your photographs with computer software will also be discussed. Additionally, many dentists have an interest in general photography and techniques for both intraoral, as well as wildlife and general photography, will be discussed in the general context of photography for the dental professional. Examples will be discussed in detail showing how the balance of shutter speed, aperture opening, ISO setting and focal length can lead to the capture of photographs that will make you proud!

### **LEARNING OBJECTIVES:**

- the attendee will be able to select the appropriate equipment for the chosen level of expertise
- the attendee will be able to define and practice the core components of a successful photograph
- the attendee will be able to discuss the ethical and professional responsibility in the modification of photographs

**Richard Simonsen, DDS, MSc, PhD (Hon)** is the Founding Dean of Midwestern University, College of Dental Medicine, in Glendale, Arizona, one of the newest dental schools in the United States. From 1989–1999, Dr. Simonsen was Global Professional Services Manager for the 3M Company, Dental Products Division, St. Paul, Minnesota. Until 1989 he was Professor and Chairman of the Department of General Dentistry at the University of Tennessee, Memphis. He was the Editor-in-Chief of Quintessence International from 1984 to 1996. In 2011 he will be starting a new journal for Quintessence Publishing Company as Editor-in-Chief, the American Journal of Esthetic Dentistry. Dr. Simonsen has authored three textbooks and numerous scientific publications, has lectured in over 30 countries, and is the developer of the Preventive Resin Restoration procedure and the etching of porcelain for esthetic and restorative procedures. He has been awarded a Lifetime Achievement Award from the World Congress of Minimally Invasive Dentistry and he received the 1999 Distinguished Service Award from the American Society of Dentistry for Children. In 2010 he was awarded an Honorary Doctorate (PhD) from the University of the Western Cape, Cape Town, South Africa. Richard Simonsen is also an established photographer whose photographs of wildlife and other favorite subjects, such as the Blue Angels Flight Demonstration Squadron, challenge the average photographer in how to photograph fast-moving subjects up to the speed of sound!

<b>Tuition:</b>	<b>until Jan 14</b>	<b>after Jan 14</b>
<b>Dentists:</b>	<b>\$245</b>	<b>\$270</b>
<b>Dental Hygienists:</b>	<b>\$140</b>	<b>\$155</b>
<b>Dental Technicians:</b>	<b>\$140</b>	<b>\$155</b>
<b>Certified Dental Assistants:</b>	<b>\$120</b>	<b>\$135</b>

Continental Breakfast and Luncheon included.

**Location: Lecture Hall #6, Instructional Resources Centre (IRC), and the Nobel Biocare Oral Health Centre**

**Times: Registration: 8:30 am**  
**Course commences: 9:00 am**

**6 hours of instruction**

## **UBC DENTISTRY RESEARCH DAY 2011**

### **Dignity and Quality of Life for a Frail Population**

UBC Student Union Building Ballroom

**Research Day 2011 is pleased to highlight the research being done by several members of UBC's ELDERS (Elders Link with Dental Education, Research and Service) Group, a multidisciplinary team which draws on expertise from many faculties.**

The frail—those typically over 75 with physical or mental disabilities that interfere with independent daily activity—receive almost no attention in today's youth-skewed culture. Attention to oral health is possibly the most neglected medical concern in this population, however, if a senior's dental needs remain unattended, whether a result of tooth decay or poor hygiene, serious oral and medical problems can occur.

The Faculty of Dentistry is honoured to include presentations on this pressing concern from a diverse and complementary group of full-time faculty, along with Dr. Lynn Beattie and Hamber Visiting Professor Dr. Asuman Kiyak. Beattie is professor emeritus, UBC Department of Medicine, Division of Geriatric Medicine, and Kiyak is professor and director of the Institute on Aging at the University of Washington, Seattle.

**To register for this course please check on line at [www.dentistry.ubc.ca/ResearchDay](http://www.dentistry.ubc.ca/ResearchDay)**

**Please see website for Schedule of events: [www.dentistry.ubc.ca/ResearchDay](http://www.dentistry.ubc.ca/ResearchDay)**

**Saturday and Sunday, January 29 and 30, 2011 DE9138R**

### **A Comprehensive Review of Local Anaesthesia for Dental Hygienists**

Registered dental hygienists who have taken a local anaesthesia program, but would like a review course, are invited to participate in SESSION I of the Local Anaesthesia program being offered by Continuing Dental Education this winter.

**PROGRAM DESCRIPTION:** A two-day comprehensive review designed to teach and revisit basic and current concepts of local anaesthesia and administration of local anaesthetic agents. Come and participate in two full days that include lectures and an opportunity for hands-on practice of clinical techniques. Participants must be currently registered to practice in British Columbia. As participants practice on each other, you must be able to receive local anaesthesia or you must provide a stand-in for your partner.

#### **LEARNING OBJECTIVES:**

Upon completion of this course, participants will be able to:

1. Describe head and neck anatomy related to the administration of local anaesthetic agents.
2. Describe principles of pharmacology related to local anaesthetic agents and adrenergic drugs.
3. Demonstrate the various techniques involved in the administration of local anaesthetic agents.
4. Explain patient evaluation, complications and office emergencies as related to local anaesthesia.

The textbook, *HANDBOOK OF LOCAL ANAESTHESIA (5th Edition)*, by Dr. Stanley Malamed is recommended for review prior to the course. A self aspirating syringe is provided to each participant on the first day of the course.

**NOTE:** If you are from out of province, it is your responsibility to make arrangements with the College of Dental Hygienists of British Columbia for a temporary practitioner permit in order to administer local anaesthetic agents during this course.

**Tuition:****Dental Hygienists: \$650****Location: Nobel Biocare Oral Health Centre and the IRC Building****Times: Registration: 8:30 am  
Course commences: 9:00 am****14 hours of instruction**

LIMITED ENROLMENT

A course schedule and pre-reading package will be forwarded upon registration.

**Friday and Saturday, January 29, 30 and  
February 25 and 26, 2011****DE9138****Local Anaesthesia for Dental Hygienists**

This is a three and a half day course, designed to teach basic and current concepts of local anaesthesia, and administration of local anaesthetic agents. This course is comprised of two sessions. As participants practice on each other, you must be able to receive local anaesthesia or you must provide a stand-in for your partner.

- **SESSION I** – (two full days, January 29th and January 30th) consists of didactic information, instruction, and application of clinical techniques.
- **SESSION II** – (February 25th evening and February 26th full day) consists of written and clinical evaluations.

**INSTRUCTOR TEAM**

- Teri-Lee Norfolk, Dip DH, DMD
- Doug Nann, DMD
- Ellen Stradiotti, Dip DH, BA
- Linda Talbot, BDSC, Dip DH
- Zul Kanji, Bsc, Dip DH, Msc
- Ann Szeto, BA Dip DH, Msc
- Susan Schmitz, Dip DH, CDA, Instructor Dip.
- Nancy Baily, Dip DH
- Alma Pauw, Dip DH, PiD, BHSc, RDH
- Ruth Lunn, Dip DH
- Jody Garofano, Dip DH Msc

**Register on line at [www.dentistry.ubc.ca/lareg](http://www.dentistry.ubc.ca/lareg)****PLEASE NOTE: To register you must have received an invitation.**

In an effort to cut down on waste, we ask course participants to consider bringing their own water bottles to courses.

We have Canadian Springs water available for all participants in the IRC building.

## Endodontics: Get better! Now!

The UBC/Hawaii course of endodontics will focus on the most relevant topics in clinical endodontics. The approach taken by both lecturers, Dr. Jeff Coil and Dr. Markus Haapasalo is first and foremost a practical one. As the best clinical results can be obtained when we also have a solid understanding of the issues leading to or complicating the treatment of endodontic diseases, theory and background information will also be addressed, facilitated by clinical examples.

### COURSE TOPICS:

1. Current trends in clinical endodontics
2. Treatment planning: Diagnosis and treatment options
3. Review of tooth morphology and anatomic variations
4. Instrumentation: on the cutting edge
5. Effective and safe irrigation: need to know and good to know
6. Evaluating endodontic success versus failure; deciding upon endodontic retreatment versus endodontic surgery: risks and benefits
7. How to secure optimal long term endodontic results and treatment outcomes
8. Update on resorptions
9. Longitudinal tooth fractures: Most dentists don't know this...

### 12 HOURS OF INSTRUCTION

**Markus Haapasalo DDS, PhD, Fellow of RCDC (endodontics)** received his dental degree from the Faculty of Dentistry of the University of Helsinki, Finland in 1978. From 1995 to 2004 he was a Professor of Endodontics in Oslo, Norway and from 2004 professor and chair of the Division of Endodontics at UBC, Vancouver, Canada. He is also the head of the Department of Oral Biological and Medical Sciences.

Dr. Haapasalo has authored or co-authored over 100 scientific articles. He is the editor-in-chief of "Endodontic Topics", an associate editor of "Journal of Endodontics", Editorial Board member of "International Endodontic Journal", and editor of "Visual Endodontics 2010" multimedia. In clinical endodontics his areas of special interest include instrumentation, irrigation, persistent infections, and resorptions. Dr. Haapasalo has received several teaching awards including the Louis I. Grossman International Award by the French Endodontic Society in 2007. He is actively lecturing about endodontics worldwide.

**Jeffrey M. Coil, DMD, MSD, Ph.D, FRCD(C), FADI, FACD** received his undergraduate, dental and doctorate degrees from the University of British Columbia. He practiced general dentistry for 8 years and was a Clinical Instructor in Endodontics and Periodontics, before obtaining his certificate in Endodontics at the University of Washington in 1993. Dr. Coil is a Diplomate, American Board of Endodontics. He serves as an editorial consultant for the Journal of the Canadian Dental Association and on the Scientific Advisory Board for the Journal of Endodontics. He is a past President of the Canadian Academy of Endodontics, and is a member of the British Columbia Society of Endodontists and the American Association of Endodontists. Dr. Coil is the mentor of the Northwest Endodontic Study Club and Seminar, and is currently the Director of the Graduate Endodontics Program, Department of Oral Biological and Medical Sciences, University of British Columbia.

## Clinical Diagnosis of Oral Lesions

Traditionally oral pathology has been taught in dental schools by presenting either clinical or histologic images and asking the student to recall their names. In clinical practice alterations in the oral soft and hard tissues rarely resemble the images from either dental school classes or oral pathology textbooks. The objective of this presentation is to guide the participants to develop an approach for the differential diagnosis of lesions of the soft tissues of the oral cavity through evaluation of key features of the lesions and reference to the anatomy/histology of the intraoral site. This approach builds on strengths resulting from the clinical care of patients to provide a more comprehensive strategy to develop a differential diagnosis.

### 3 HOURS OF INSTRUCTION

**Charles F. Shuler, D.M.D., Ph.D.** is the Dean of the Faculty of Dentistry of the University of British Columbia. Prior to UBC he was a faculty member at the University of Southern California for 18 years. At USC he served as the Director of the University of Southern California Center for Craniofacial Molecular Biology holding an endowed chair position as the George and Mary Lou Boone Professor of Craniofacial Molecular Biology. He also served as the Director of the Graduate Program in Craniofacial Biology and the Associate Dean for Student and Academic Affairs at the USC School of Dentistry. Dr. Shuler received his B.S. in Biochemistry from the University of Wisconsin, his D.M.D. from Harvard School of Dental Medicine, his Ph.D. in Pathology from the University of Chicago and his Oral Pathology specialty education at the University of Minnesota and the Royal Dental College Copenhagen Denmark. His current research interests include craniofacial development, oral carcinogenesis and gene therapy.

### CONFERENCE FEES:

#### Tuition:

<b>Dentists:</b>	<b>\$895</b>
<b>Dental Hygienists:</b>	<b>\$445</b>
<b>Dental Technicians:</b>	<b>\$445</b>
<b>Certified Dental Assistants:</b>	<b>\$445</b>

Tuition fees include seminar kit, continental breakfast, morning break and other relevant materials that may be provided. 15 hours of instruction

### COURSE CANCELLATION:

Full refunds less a \$50.00 service charge will be granted for cancellations made 60 days prior to the course. Cancellations made between 30 and 60 days prior to the first day of the program will receive a 50% refund. No refunds will be granted for cancellations made less than thirty days prior to the first day of the program.

### HOTEL RESERVATIONS AND AIRFARES:

Located on the pristine white sands of Wailea, the Fairmont Kea Lani is Hawaii's only luxury oceanfront resort featuring spacious suites and villa accommodations for Maui vacations and vacation packages. This distinctive Maui accommodation encompasses 22 acres of tropical landscape and offers authentic Hawaiian cultural experiences and warm and personal service which portray the essence of aloha. A luxurious haven in one of the most scenic places on earth, the Fairmont Kea Lani located on Polo Beach, Wailea, is just 17 miles from the Kahului Airport, but a world away from the hustle and bustle of the city.

Special airfares and hotel reservations have been arranged for course members that are not available to the general public. We have negotiated special direct flight rates and very attractive room rates at the Kea Lani Resort that are not available to the public, and cannot be matched on-line! Please call Jane Patrick at North South Travel 604-717-1751 or email [jane@nstravel.bc.ca](mailto:jane@nstravel.bc.ca) to book today!

**Friday, February 18**  
**Making Fun of Oral Surgery**

*Dr. Ian Matthew*

Oral surgery can be a practice builder. It can also be a satisfying component to the varied skill set of general dental practice. The aim of this presentation is to provide an update on various aspects of oral surgery with the objective of making the surgery safer, less stressful and more enjoyable for clinician and patient alike.

**TOPICS TO BE ADDRESSED IN THIS THREE-HOUR PRESENTATION INCLUDE:**

- Instrumentation
- Application Of Radiography For Safer Surgical Procedures
- Local Anaesthesia – Technique And Pharmacology
- Newer Concepts Of Surgical Exodontia
- Third Molar Surgery Hints And Tips
- Common oral lesions and their management

**Ian Matthew, PhD, MDent, Sc, BDS, FDSRCS(Eng), FDSRCS(Ed)** is a full-time member of the faculty of UBC's Faculty of Dentistry. He was trained as an oral surgeon in the United Kingdom, and is licensed as a specialist in oral surgery within the European Union. He has over 25 years of experience in teaching oral surgery at the undergraduate and graduate level. He has been the recipient of several teaching awards during his time at UBC. Dr. Matthew also maintains a part-time clinical practice in Burnaby.

**3 HOURS OF INSTRUCTION**

**Saturday, February 19**  
**Aesthetics & Function of Ceramic Restorations**

*Dr. Chris Wyatt*

Aesthetics & Function are interrelated in the delivery of successful veneers, crowns, and bridges. This one-day course will cover aesthetics concepts, dental materials, occlusion, and longevity of ceramic restorations. An emphasis will be placed upon the clinical use of the new aesthetic restorative materials including zirconium dioxide and lithium disilicate glass ceramics.

**SCHEDULE:**

9:00 - 10:30	Aesthetic Concepts
10:30 - 10:45	Coffee Break
10:45 - 12:00	Aesthetic Concepts (cont.)
12:00 - 1:00	Lunch
1:00 - 2:30	Porcelain Veneers
2:30 - 2:45	Coffee Break
2:45 - 4:00	Ceramic Crowns

**Chris Wyatt, BSc, DMD, MSc, FRCD(C), Dip Pros** is a Certified Specialist in Prosthodontics and an Associate Professor and Head of the Division of Prosthodontics and Dental Geriatrics at the University of British Columbia, Faculty of Dentistry. He is the 2009 recipient of the W.W. Wood Award for "Excellence in Dental Education." In 1998 Dr. Wyatt was the recipient of the Killam Teaching Award. In addition to lecturing and providing continuing education courses on Prosthodontics within and outside of Canada, he enjoys treating patients with prosthodontic concerns in his private practice. Dr. Wyatt is past President of the Association of Prosthodontists of Canada and the BC

Society of Prosthodontists, and an associate member of the Pacific Coast Society for Prosthodontics. He is an active member of the Canadian Dental Association, British Columbia Dental Association, and the College of Dental Surgeons of British Columbia.

## 6 HOURS OF INSTRUCTION

<b>Tuition:</b>	<b>until Jan 29</b>	<b>after Jan 29</b>
<b>Overall package:</b>		
<b>Dentists:</b>	<b>\$435</b>	<b>\$475</b>
<b>Allied Dental Personnel:</b>	<b>\$260</b>	<b>\$285</b>
(includes both course presentations, handouts and Saturday luncheon)		
<b>Friday, February 18th</b>		
<b>Dentists:</b>	<b>\$155</b>	<b>\$170</b>
<b>Allied Dental Personnel:</b>	<b>\$105</b>	<b>\$120</b>
<b>Times:</b>	<b>Registration:</b>	<b>4:00 pm</b>
	<b>Course time:</b>	<b>4:30 – 7:30 pm</b>
<b>Saturday, February 19th</b>		
<b>Dentists:</b>	<b>\$295</b>	<b>\$325</b>
<b>Allied Dental Personnel:</b>	<b>\$160</b>	<b>\$175</b>
<b>Times:</b>	<b>Registration:</b>	<b>8:30 am</b>
	<b>Course time:</b>	<b>9:00 am – 4:00 pm</b>
<b>Location:</b>	<b>Chilcoot Conference Centre &amp; Hotel Silver Star Club Resort PO Box 3002, Silver Star Mountain, B.C.</b>	

## ACCOMMODATION:

Located on one of Western Canada's finest ski areas! Silver Star Mountain offers the ultimate in downhill skiing for every member of the family, featuring over 100 superb runs, a number of which are also open for night skiing, and 10 lifts. For the cross-country skier, Silver Star offers 55 km of groomed trails, and 4 km of lit track for night skiing. There are several activities available including Tube Town, outdoor skating and sleigh rides. The pedestrian only village offers ski-in, ski-out access to all of the amenities on the mountain!

The Resort is located 22 km (12 miles) northeast of Vernon, BC and is just a 50-minute drive from nearby Kelowna, BC. Hotel check-in is located in the Vance Creek Building.

**Check out the mountain's facility, log onto [www.silverstarmtn.com](http://www.silverstarmtn.com).**

Silver Star Club Resort is offering special hotel conference rates if you make your reservation before January 18th, based on availability. Identify yourself with the UBC Continuing Dental Education. Quote group name UBC Dental.

**Registrants are required to make their own accommodation arrangements with Silver Star Club Resort by:**

To book your accommodation, please call **(250) 549-5191**  
or **1 (800) 610 - 0805**

## Predictable C & B Impressions and Simplified Temporization – A Hands on Program

Dr. Len Boksman

**COURSE DESCRIPTION:** Simplification with predictability in crown and bridge seems hard to achieve unless you have materials and techniques that work in synchronicity. This program will present systems of impressing and temporization that lead to increased productivity and time savings with less clinical variability. These systems will facilitate insertion of crown and bridge restorations and veneers with minimal time spent. Also discussed will be tissue management and how various haemostatic agents affect polyvinyl siloxane materials and subsequent bonding. The afternoon will be a hands on program on temporization during which the participants will have the opportunity of preparing anterior veneer temporaries, a three unit temporary bridge, a single unit temporary, and if time allows a reduction coping.

### WHAT YOU WILL LEARN:

- Impressions – the use of matched systems
- Cords
- Haemostatic Agents
- Materials for Crown & Bridge Temporaries
- Bite Registrations – why they are a problem for the lab and you
- Temporization for posterior full coverage
- Simple temporization for anterior veneers
- The use of reduction guides and clear silicone matrix for temporization with light cure composite

**PLEASE NOTE: If you wear magnification loupes while practicing, we recommend you bring them to this hands-on course.**

**Len Boksman DDS, BSc** is the Director of Clinical Affairs at Clinical Research Dental. He graduated from the Faculty of Dentistry at University of Western Ontario in 1972, where he also completed his BSc degree in 1984. From 1972 to 1979, he maintained a private practice in Burlington, Ontario and during that period he became involved in teaching. From 1979 until 1987 Dr. Boksman was an Associate Professor in the Division of Operative Dentistry at the Schulich School of Medicine and Dentistry. He operated his private practice in London, Ontario from 1987 to 2005. Dr. Boksman was also a member of the Editorial Board of REALITY from 1988 to 2003. Dr. Boksman has published over 100 refereed articles and chapters in dental texts. He has given numerous international lectures in Restorative Dentistry and has an extensive list of experiences, distinctions and awards. He has recently returned to private practice in London, Ontario.

<b>Tuition:</b>	<b>until Jan 28</b>	<b>After Jan 29</b>

## **Local Anaesthesia – The Backbone of Pain Control in Dentistry**

*Dr. Stanley Malamed*

**COURSE DESCRIPTION:** Local anaesthesia forms the backbone of pain control techniques in dentistry. Local anaesthetic drugs are the safest and the most effective drugs in medicine for the prevention and management of pain.

In this program Dr. Malamed will discuss some of the exciting innovations that are occurring in the area of pain control in dentistry with an emphasis on local anaesthesia.

After an overview of the subject of dental pain control Dr. Malamed will discuss (1) the local anaesthesia 'ON' switch -- buffered local anaesthetics, providing profound pain control within 2 minutes of injection; (2) the LA 'OFF' switch phentolamine mesylate, enabling sensation to be restored significantly faster; (3) IN (intranasal) local anaesthesia – permitting treatment on maxillary teeth without injection; (4) C- CLAD (computer--controlled LA delivery– making all injections more comfortable; (5) a review of articaine HCl – new research on its effectiveness in mandibular infiltration, (6) the dilemma of the 'hot' mandibular molar – how to effectively anaesthetize these difficult teeth; (7) LA in the paediatric population – how to make LA safer in younger patients, and (8) the question of paresthesia as related to the administration of LA.

**Stanley F. Malamed, D.D.S** was born and raised in the Bronx, New York, graduating from the New York University College of Dentistry in 1969. He then completed a dental internship and residency in anaesthesiology at Montefiore Hospital and Medical Center in the Bronx, New York before serving for 2 years in the U.S. Army Dental Corps at Ft. Knox, Kentucky. In 1973, Doctor Malamed joined the faculty of the Herman Ostrow School of Dentistry of U.S.C., in Los Angeles, where today he is Professor of Anaesthesia & Medicine. Dr. Malamed is a Diplomate of the American Dental Board of Anaesthesiology, as well as a recipient of the Heidebrink Award [1996] from the American Dental Society of Anaesthesiology and the Horace Wells Award from the International Federation of Dental Anaesthesia Societies, 1997 (IFDAS).

<b>Tuition:</b>	<b>until Feb 12</b>	<b>After Feb 12</b>

## **Digital Radiography: Want to go Digital? Don't Know Where to Start?**

*Ms. Neala Welburn, Ms. Susan Schmitz*

**COURSE DESCRIPTION:** Digital radiography is rapidly becoming a well-accepted tool for oral and maxillofacial radiology. A large number of systems for oral radiography are available in the market at this moment. This ½ day hands-on course will highlight the pros and cons of two intra-oral systems: PSP (Photostimulable Phosphor Plate) and CCD (Charge Couple Device). Learn about the advantages and disadvantages of each system and gain the knowledge to make an informed purchasing decision. Determine what the differences are in exposure technique. This course will highlight specific features of both direct and indirect digital technologies and compare them with conventional film based imaging. The first hour will cover the pros and cons of each session didactically, and the last 2 hours will be hands-on in the clinic to see firsthand what the differences are, such as image manipulation and exposure.

By the end of this course, the participant will have enough knowledge of each digital system to make an informed decision regarding which system is right for their office.

**This course will be of interest to the entire dental team!**

**Neala Welburn, CDA, PID** is a Certified Dental Assistant with 19 years of practice experience and 3 years as a Clinical dental radiography educator with the DMD and DH students at the University of British Columbia. She has participated in Radiography for Dental Educators at the University of North Carolina where she gained knowledge of recent advances in digital imaging techniques and technology. Ms. Welburn's input was integral to the implementation and transition to digital radiography in the Nobel Biocare Oral Health Centre. Along with her expertise in dental radiography she trains faculty and students in the use of the electronic patient record and imaging systems.

**Susan Schmitz, RDH, CDA, Dip DH, PID** is a Dental Hygienist with 27 years of practice experience and 10 yrs plus as a dental radiology educator with CDA and DH students at Vancouver Community College and the University of British Columbia. She has participated in Radiography for Dental Educators at the University of North Carolina and University of Texas. Susan enjoys working with students and practicing dental professionals to ease the transition from film-based imaging to new digital imaging technology.

<b>Tuition:</b>	<b>until March 12</b>	<b>after March 12</b>
<b>Dentists:</b>	<b>\$ 160</b>	<b>\$ 175</b>

**Thursday Evening, April 7, 2011****DE 9342****Orthodontic Treatment Planning: Optimizing the Smile and Facial Aesthetics***Dr. Linda Taylor and Dr. Sara Shamloo*

Lecture Synopsis: The goal of the orthodontist is to achieve a functional occlusion but also to make our patients more attractive. We will analyze the smile and the face discussing the arrangements and proportions that are considered most aesthetic. Orthodontic cases will be shown illustrating treatment planning principles that can optimize dental and facial aesthetics for your patients. Ideal occlusions and excellent aesthetics can best be achieved in patients with ideal jaw relationships and perfectly proportioned teeth...but for everyone else there must be some compromises. We must be careful not to make choices that compromise aesthetics.

Linda Taylor, DDS and Dr. Shamloo, DDS, are partners in an orthodontic practice in Coquitlam. Dr. Taylor graduated from UBC dentistry in 1982 and completed her orthodontic training in Toronto in 1989. Her special interest is facial aesthetics and the evolutionary reasons behind our aesthetic preferences. Dr. Shamloo graduated from dentistry in 1997 from McGill and completed her orthodontic training in 2005 at Western Ontario. Her Master's thesis involved a study of lip aesthetics as influenced by an extraction or non-extraction treatment approach. Both Dr. Taylor and Dr. Shamloo share an almost obsessive interest in analyzing the facial aesthetics of their patients and tabloid celebrities which they feel complements their orthodontic practice.

<b>Tuition:</b>	<b>before Mar12</b>	<b>after March 12</b>

**Wednesday evening, April 20, 2011****DE9341****Traumatic Injuries to the Primary Dentition***Dr. Lisa Coveney*

Course Description: From the moment they are born, children are busy exploring and learning from their environment. Whether they are male or female, one or four years old, they are active beings that are looking for constant stimulation. As a consequence many children experience bumps and falls with resulting damage to their teeth. This case based lecture will explore the types of injuries seen most commonly on the primary dentition. In addition, we will discuss the treatment options, the follow-up protocol, the possible complications and the techniques for approaching young children who are often challenging to examine at the best of times.

Lisa Coveney BSc, DMD, MSD, FRCD is a board certified paediatric dentist with a private practice in Langley, British Columbia. Dr. Coveney received her undergraduate science degree at Simon Fraser University and subsequently completed her dental degree at the University of British Columbia. After several years in general practice she then went on to complete her specialty training and masters degree in paediatrics at the University of Washington in Seattle.

Around a busy family life, Dr. Coveney currently assists with some part time teaching for the paediatric department at the University of British Columbia. She is a member the American Academy of Paediatric Dentistry, the Canadian Academy of Paediatric Dentistry and the BC Society of Paediatric Dentists and is currently working on completed her board certification in the United States.

**DE9295**

## **Inhalation and Oral Sedation in Dentistry**

*Dr. David Donaldson, Dr. Mark Donaldson and  
Dr. Fred Quarnstrom*

This two part hands-on course offers instruction in all aspects of inhalation analgesia, including effective methods in dealing with anxiety control in general practice. Participants will learn various techniques and will have the opportunity to try several types of systems.

Part 1 (Friday and Saturday) is designed to achieve certification in nitrous oxide/oxygen sedation and Part 2 (Sunday) is designed for those who have successfully completed Part 1 or have previously completed a certification course in nitrous oxide/oxygen sedation (documentation required) or have completed an undergraduate program.

### **Part 1 — Friday and Saturday, April 29, 30**

- A review of all sedation techniques
- Pain mechanisms
- Applied physiology of the respiratory and cardiovascular systems
- A review of medical emergencies
- Pharmacology of oral sedatives and nitrous oxide
- Indications and contraindications for the use of nitrous oxide
- Complications with nitrous oxide sedation
- Pre-treatment evaluation of the patient
- The mechanics and maintenance of machines
- The regulations and cost effectiveness of installing a nitrous system
- The side effects of nitrous oxide including contamination and scavenging systems

**This course will include hands-on administration of nitrous oxide using various techniques, machines and equipment.**

### **Part 2 — Sunday, May 1**

Pre-requisite: Course 1 or equivalent

- A more detailed review of the pharmacology and therapeutics of all oral sedatives but especially the benzodiazepines
- Anaesthesia Update & Comparison of Techniques
- Reversal Agents and Flumazenil
- Post-operative Pain Management and Recognition and Treatment of Chronic Pain
- Practical sessions on maintaining an airway
- The utilization of oral sedatives with nitrous oxide
- Review of precautions for sedating school aged children
- Critique of other techniques being taught in North America

**This two part course is designed to meet the criteria, standards and guidelines of the College of Dental Surgeons of British Columbia, the American Dental Association, and the Association of the Canadian Faculties of Dentistry, for the teaching and administration of nitrous-oxygen sedation. A short examination is required to successfully meet these requirements.**

**David Donaldson, BDS, FDSRCS, MDS, FADSA** received his dental degree from St. Andrews University in 1965, before going on to complete his Fellowship in Dental Surgery through the Royal College of Surgeons in Edinburgh in 1969. In 1971 he was granted his Masters Degree in Restorative Dentistry by Dundee University. Dr. Donaldson came to The University of British Columbia in 1970 to become the Director of Pain and Anxiety Control in the Faculty of Dentistry. His past appointments include Head of the Departments of Oral Biological and Medical Sciences, and Oral Surgery; past Chairman of the Canadian Dental Association Council on Education; and past President of the Association of the Canadian Faculties of Dentistry, and the International Federation of Dental Education Associations. Dr. Donaldson is a Professor and Head of the Division of Pain and Anxiety Control at UBC, and has a part-time practice on Vancouver Island, restricted to the treatment of chronic head and neck pain.

**Fred Quarnstrom, DDS, FADSA, FAGD, FICD, FACD** received his dental degree from the University of Washington Dental School in 1964, and was a postgraduate resident in anesthesiology at Washington Hospital Centre in Washington, D.C. He is a Fellow of the American Dental Society of Anesthesiology, the International College of Dentistry, the Academy of General Dentistry, American College of Dentistry and a Diplomat of the American and National Dental Boards of Anesthesiology. He is certified by the American Association of Dental Consultants. Dr. Quarnstrom has published over 40 papers and two chapters, and lectured extensively on nitrous oxide oxygen analgesia and oral conscious sedation, and currently has a general practice in Seattle. He is on the faculty at the University of Washington and Faculty of Dentistry at UBC. He is a member of the Washington State Dental Quality Assurance Commission.

**Mark Donaldson, BSc(Pharm), PharmD, FASHP** received his Pharmacology degree from the University of British Columbia and his Doctorate in Clinical Pharmacy from the University of Washington. He completed a clinical residency at Vancouver General Hospital and is the current Director of Pharmaceutical Services at the Kalispell Regional Medical Center near his home in Whitefish, Montana. He is a full professor in the Department of Pharmacy at the University of Montana in Missoula, and a clinical assistant professor in the School of Dentistry at the Oregon Health & Sciences University in Portland. Dr. Donaldson is a continuing education speaker for the University of Washington, Washington State University, Oregon Health Sciences University, the University of British Columbia. He has a special interest in dental pharmacology and has lectured internationally on a number of related topics for both dental and medical practitioners, and spent three years in Japan focusing on cross-cultural communication and internationalization.

<b>Tuition:</b>	<b>until April 5</b>	<b>After April 5</b>
<b>Dentists:</b>	<b>\$1750</b>	<b>\$1925</b>

Includes continental breakfasts, lunches and all refreshment breaks.

**Location: JBM Building Room 132 A & B, 2199 Wesbrook Mall and the Nobel Biocare Oral Health Centre Clinic Faculty of Dentistry, UBC**

<b>Times:</b>	<b>Registration April 29 only</b>	<b>8:30am</b>
	<b>Course commences:</b>	<b>9:00 am</b>

**DE 9340**

## **Advanced Hard and Soft Tissue Grafting**

### **– A Three Day Cadaver Course**

*Dr. Hassan Moghadam*

**OVERVIEW:** Initially implant function was a measure of success; today, however, implant esthetics is what drives patients to seek treatment. This has raised the demands on the implant surgeons who now have to master both hard and soft tissue management around dental implants.

This hands on cadaver course is designed to treat the most challenging aspects of tissue deficiency. Both horizontal and vertical hard and soft tissue augmentation techniques will be demonstrated.

Novel soft tissue augmentation such as the Vascularized Interpositional Periosteal Connective Tissue graft (VIP-CT) will be used to correct both horizontal and vertical soft tissue deficiencies with one procedure. Vertical bone grafting techniques using GBR and autogenous blocks will be demonstrated as well as combination hard and soft tissue procedures.

Hard and soft tissue grafting techniques will be demonstrated and each participant will perform the procedure on a cadaver head.

This course will provide both the biologic rational and clinical techniques for grafting. Finally complications of each procedure will be discussed.

#### **COURSE CONTENT:**

- Biology of hard and soft tissue grafting
- Esthetic principles in implant placement
- Immediate implant placement and temporization
- Socket preservation and temporization
- Up to date clinical and scientific review of bone substitutes
- Small and large volume soft tissue augmentation
- Small and large volume bone augmentation
- Bone harvesting technique (ramus, zygoma, tuberosity, and chin)
- Combination of hard and soft tissue augmentation
- Autogenous block grafting - Vertical bone augmentation
- Autogenous J-graft - Guided tissue regeneration using membranes
- Sinus augmentation
- Nerve lateralization
- Alveolar distraction
- Complications and how to deal with them

**PLEASE NOTE: If you wear magnification loupes while practicing, we recommend you bring them to this hands-on course.**

**Hassan Moghadam, DDS, MSc, FRCD(C)** completed his dental training at McGill University followed by a multidisciplinary residency at the Royal Victoria Hospital. He then established a private practice in Vancouver BC, limiting his practice to periodontal surgery and implants. He completed his Oral and Maxillofacial Surgery training at the University of Toronto and perused a Masters in science in the field of bone regeneration. He has lectured and published both nationally and internationally in the field of bone grafting and soft tissue surgery. His lecture series are dedicated to the regeneration of perimplant tissues. His current research interests include stem cell based bone regeneration and he is working closely with the Halifax Bone Bank in developing a bone substitute. He is on the Health Canada National surveillance committee which is involved in regulating cells, tissues and organ transplants in Canada.

**Tuition: Dentists: \$4000.00**

Full 3 day program • Human cadaver heads maxilla and mandible provided.

**Instrumentation:** Participants are required to bring surgical instruments with him/her for the cadaver dissection and bone graft harvesting. A list will be provided upon receipt of completed application.

**Location: UBC Faculty of Dentistry and Life Science Building**

**Times: Friday May 13 8:30 – 4:30 all day lecture**  
**Saturday May 14 & 15 Hands on and Didactic**

**21 hours of instruction**

*A portion of this program is being generously sponsored by unrestricted educational grants from DENTSPLY Tulsa Dental Specialties.*

**May 25 – June 8, 2011****DE9125****Orthodontic Module for Certified Dental Assistants

Tucker. Each day begins with a lecture before proceeding to the hands-on clinical day. In addition to working on individual patient cases, participants will gain a more in-depth understanding of laboratory procedures.

Participants are responsible for providing their own assistant, patients, and supplies.

For clinicians from out of town arrangements can be made for assistant and suitable patient candidates if required. Please contact our office at [cde@interchange.ubc.ca](mailto:cde@interchange.ubc.ca) to request arrangements.**Margaret A. Webb, DMD** graduated from The University of British Columbia and has a private practice in general dentistry in Vancouver, B.C. She is actively involved in the Academy of R.V. Tucker Study Clubs and is the Co-coordinator of the cast gold course for 3rd year dental students at UBC. Dr. Webb received the Clinician of the Year from the American Academy of Gold Foil Operators in November 2008. Dr. Webb is also a member of the Academy of Operative Dentistry, International College of Dentists and the American College of Dentists.**Tuition:****Dentists: \$2,895.00  
(laboratory and CDA expenses are extra)****LIMITED ENROLMENT**

Includes all coffee breaks and lunches for Dentists and Certified Dental Assistants.

**Location: Nobel Biocare Oral Health Centre, Faculty of Dentistry****Times: Course times 8am – 6pm****(Format and times vary slightly each day)****40 hours of instruction for Dentists****16 hours of instruction for Certified Dental Assistants**

## CLINICAL PARTICIPATION COURSES 2011 – 2012 (Limited Enrolment)

For more information or to put your name on the waitlist, please telephone 604 822-2627.

### Basic Orthodontics for the General Practitioner

*Dr. Paul Witt*

**Friday mornings**

**JB MacDonald Building, Faculty of Dentistry, UBC**

**53 hours of instruction** **September 2011 – June 2012**

### Advanced Orthodontics for the General Practitioner

*Dr. Clement Lear*

**Thursdays, Fridays, and Saturdays** (Morning and Afternoon Sessions)

**JB MacDonald Building, Faculty of Dentistry, UBC**

**60 hours of instruction** **September 2011 – August 2012**

### Advanced Prosthodontics for the General Practitioner

*Dr. Chris Wyatt*

**Tuesday Evening Sessions**

**Richmond Campus of Kwantlen University College**

**28 hours of instruction** **October 2011 – May 2012**

### Periodontics & Implants for the General Practitioner

*Dr. Tassos Irinakis*

**Wednesday Evening Sessions**

**Richmond Campus of Kwantlen University College**

**24 hours of instruction** **October 2011 – May 2012**

### Cutting Edge Periodontal Surgery for the General Practitioner

*Dr. Jim Grisdale*

**3 Saturday Sessions**

**Nobel Biocare Oral Health Centre, Faculty of Dentistry, UBC**

**21 hours of instruction** **January 2011 – April 2011**

*Dr. Tassos Irinakis*

**Wednesday Evening Sessions**

**Richmond Campus of Kwantlen University College**

**25 hours of instruction** **October 2011 – May 2012**

## CLINICAL TOPICS IN DENTISTRY PROGRAM

**37 topics available – 28 available on DVD! Great Savings when you purchase 3 or more!**

Clinical Topics in Dentistry is a series of educational programs designed to enable dental professionals to learn independently. The Clinical Topics have been recorded from live procedures performed at the midwinter meetings of the Chicago Dental Society and the Hinman Dental Society.

These videos are available for purchase. Each program includes one study guide and one post-test. Once you have placed an order, your clinical videos will be mailed to you so that you may begin working on them at your own pace. As you complete each program, send the original post-test to Continuing Dental Education. Your credits will be forwarded to your licensing body at the end of each month, if applicable. Your post-tests will be marked and a certificate of completion will be sent to you. Extra study guides are available for additional participants, only if purchased at the time of the initial order.

To receive a copy of our catalogue, please call Continuing Dental Education at 604.822.2627, or e-mail us at [cde@interchange.ubc.ca](mailto:cde@interchange.ubc.ca). For more information on our video program please visit our website at [www.dentistry.ubc.ca/cde](http://www.dentistry.ubc.ca/cde) and click on "Clinical Videos".

## DIRECTIONS TO INSTRUCTIONAL RESOURCES CENTRE, J.B. MACDONALD BLDG, AND THE NOBEL BIOCARE ORAL HEALTH CENTRE ON THE UBC CAMPUS

### Driving from Vancouver International Airport

From the airport, follow the signs to Vancouver. Look for SW Marine Drive exit on the north side of the Arthur Laing Bridge. Turn left on West 70th Avenue. West 70th Avenue becomes SW Marine Drive. Follow S.W. Marine Drive for approximately 15 km (10 miles). From SW Marine Dr, turn right onto West 16th Avenue. Follow West 16th Avenue for about two blocks and turn left onto Wesbrook Mall. Continue along Wesbrook Mall until you reach Gate 11. Turn left at Gate 11 onto Thunderbird Boulevard. Turn right onto Health Sciences Mall. Continue for two blocks and turn left at 3-way stop. The Parkade is on your immediate right. The Instructional Resources Centre (Woodward/IRC) Building is immediately east of the Parkade. The J.B. MacDonald Building and the Nobel Biocare Oral Health Centre are just east of the IRC Building.

### Driving from Seattle:

Take Highway 99 into Vancouver (Hwy 99 becomes Oak Street) and turn left onto 41st Avenue, which merges into Southwest Marine Drive (approximately 10 km (6 miles)). Stay on Southwest Marine Drive until West 16th Avenue and turn right. Follow West 16th Avenue for about two blocks and turn left onto Wesbrook Mall. Continue along Wesbrook Mall until you reach Gate 11. Turn left at Gate 11 onto Thunderbird Boulevard. Turn right onto Health Sciences Mall. Continue for two blocks and turn left at 3-way stop. The Parkade is on your immediate right. The Instructional Resources Centre (Woodward/IRC) Building is immediately east of the Parkade. The J.B. MacDonald Building and the Nobel Biocare Oral Health Centre are just east of the IRC Building.

### Driving from Downtown:

Take either Granville or Burrard Streets, and turn right (west) on to 4th Avenue. Follow 4th Avenue westbound for approximately 5km (3 miles), until it turns into Chancellor Boulevard. Turn left onto Wesbrook Mall and continue along Wesbrook until you reach Gate 11 (second set of lights). Turn right at Gate 11 onto Thunderbird Boulevard. Turn right onto Health Sciences Mall. Continue for two blocks and turn left at 3-way stop. The Parkade is on your immediate right. The Instructional Resources Centre (Woodward/IRC) Building is immediately east of the Parkade. The J.B. MacDonald Building and the Nobel Biocare Oral Health Centre are just east of the IRC Building.

Due to construction on campus, these directions may change slightly – please watch for signs. We apologize for any inconvenience.
