

Occlusion and Function

Dr. John Nasedkin

COURSE DESCRIPTION:

Occlusion is the key to most aspects of successful restorative, implant and aesthetic dentistry. The long-term function of both adhesive and cemented restorations depends on chewing and para-functional forces that do not overcome bonds and material strengths. Concepts of joint-based occlusion for incorporation into routine clinical and diagnostic practice will be highlighted in this one-day program.

COURSE TOPICS:

- | | |
|--|---|
| 1. Occlusion/tmj joint screening leading to treatment differentiation. | technique for developing an optimal chewing system engram. |
| 2. TM Joint clicking – a joint-based determination of which patients to treat and how. | 5. Occlusal appliances: Mastering the stabilization splint for effective jaw reprogramming. |
| 3. Identify the critical canine and anterior guidance patterns which support bonded porcelain and decrease muscle tension. | 6. Introduction to bite raising and jaw repositioning determinations and techniques. |
| 4. Outline a sequence for restoring canine guidance and an occlusal adjustment | 7. How occlusion complements smile design and delivery. |

CLINICIAN:

John Nasedkin, D.D.S., F.R.C.D.(C), F.A.D.M., is a consultant prosthodontist in Vancouver Canada, who has taught occlusion/tmj and aesthetics on every continent. He is a past-President of the American Equilibration Society and a member of the Pacific Coast Society of Prosthodontists, the American Academy of Cosmetic Dentistry and many prestigious organizations. He is the co-editor of the book, *"Occlusion: The State of the Art"*. He mentors the first aesthetic study club in Canada (27 years) and is a Clinical Assistant Professor in Graduate Occlusion and Prosthodontics at UBC.

This program will be very shortly followed by six half-day sessions as a clinical practical series for which patients are required. You will master occlusion and tmj management including oral appliances and bite refinement. A complete protocol for diagnostic assessment and an informed consent letter are essential achievements. The emphasis is on patient experience to provide enhanced treatment planning and execution.
