TABLE OF CONTENTS — COURSES AT A GLANCE, 2017/2018

SEPTEMBER

Page

FRIDAY - SUNDAY: SEPTEMBER 22 – 24
THURSDAY - SUNDAY: NOVEMBER 2 – 5

5  A Seven Day Hands-on Surgical Course
   Drs. Sadeghi, Aminzadeh and Irinakis of the West Coast Institute

SATURDAY, SEPTEMBER 23

6  Treatment Planning Implant Restorations for the Partially and Completely
   Edentulous Patient
   Drs. Brian K.S. Kucey and Steven Sadowsky

SATURDAY & SUNDAY:
   SEPTEMBER 23 – 24

7  A Comprehensive Review of Local Anaesthesia for Dental Hygienists

FRIDAY – SUNDAY: SEPT 29 – OCT 1, NOV 3 – 5, DEC 1 – 3

8  Certificate in Dental Practice Management
   Dr. Jim Armstrong, Dr. Anthony Boardman, Dr. Mahesh Nagarajan, Dr. Tim Silk,
   Scott Sinclair, Dr. Daniel Skarlicki

FRIDAY & SATURDAY:
   SEPTEMBER 29 – 30 AND OCTOBER 27 – 28

9  Smile Design Excellence
   Live Patient Hands-on Experience
   Dr. Wilson Kwong

OCTOBER

Page

SATURDAY, OCTOBER 21

10  Medical Emergencies in the Dental Office
    Dr. David Isen

FRIDAY - SUNDAY: OCTOBER 20 – 22

11  Mastering Adult Minimal Sedation:
    Inhalation and Oral Sedation in Dentistry
    Drs. Jason Goodchild, Mark Donaldson and Scott Dickinson

SATURDAY, OCTOBER 28

13  Posterior Composites: A Rapid, Simplified Placement Technique
    Dr. Ronald Jackson

NOVEMBER

Page

FRIDAY & SATURDAY: NOVEMBER 17 – 18

14  Soft Tissue Grafting for the General Practitioner
    Drs. Tassos Irinakis and Farzan Ghannad

SATURDAY & SUNDAY:
   NOVEMBER 18 – 19

15  Introduction to Dental Microscopy and Advanced Endodontics
    Dr. Jeffrey M. Coil

SATURDAY, NOVEMBER 25

16  Fundamental Principles of Periodontal Instrumentation
    Penny Hatzimanolakis

SATURDAY, NOVEMBER 25

17  Clinical Hypnosis in Dentistry: Practical Rapid Induction Techniques for Dentists
    Dr. Lance Rucker

TRAVEL AND LEARN PROGRAMS 2018

18  Maui, Hawaii | Adventure and Learn
    Whistler, BC | Annual Ski Seminar
    Palm Springs, California | Dental Practice
    Transition Seminar and Golf Weekend
    Big Island, Hawaii | UBC Orthodontic Symposium

STUDY CLUBS

19  Radiant Advanced Orthodontic Study Club
    Basic Orthodontics for the General Practitioner
    Advanced Orthodontics for the General Practitioner
    Advanced Fixed Prosthodontics for the General Practitioner (Part II)

CE PARTNERS

20  AAID Vancouver MaxiCourse
    Moderate Conscious IV Sedation for Dentistry

DIRECTIONS AND MAPS
A MESSAGE FROM CONTINUING DENTAL EDUCATION AT UBC

Dear Life Long Learner:

I am very pleased to present the Fall Course Calendar sponsored by Continuing Dental Education at The University of British Columbia. I hope that by providing you with this detailed information, you will be able to take advantage of the excellent educational opportunities.

As you will discover, we have an exciting roster of travel courses again this coming year in Hawaii, Whistler and California.

I welcome your feedback on the courses that we offer and if you have any suggestions for future speakers and/or courses that you would like us to program, please e-mail me directly at cdeconf@dentistry.ubc.ca. Also, please let me know if you would like to receive our email newsletters. It would be my pleasure to hear from you!

This calendar is a brief overview of our upcoming courses. For more detailed information or newly added courses please visit our website at www.dentistry.ubc.ca/cde.

I would like to thank our sponsors for their ongoing support of our program, and you, our participants, for your continued enrolment in our courses. I hope that you are enjoying the summer, and I am looking forward to seeing you in the fall!

With kind regards,

Brenda Kiernan, Acting Director
Continuing Dental Education

Please display this catalogue in your office so that all members of your team may have access to these continuing education opportunities.
GENERAL INFORMATION

TO REGISTER: Please register online at www.dentistry.ubc.ca/cde

QUERIES Local calls: 604.822.6156
Toll free: 1.877.328.7744 (Canada & US)

EMAIL cde@dentistry.ubc.ca

CREDITS
Where applicable, participants will receive an email after the course is completed with the letter of attendance attached. Participants must submit their own CE credits to their college.

PARKING
Parking at UBC is available in the Health Sciences Visitors Parkade: weekends and evening (after 5 pm) flat rate $8.00 (Mastercard and Visa accepted). Parkade parking during weekdays is available at $1.75 per half hour up to a maximum of $16.00 per day. Parking rates are subject to change.

REFUND POLICY
Limited enrolment courses require a minimum of 21 days notice for a full refund less a $50.00 administration fee. Cancellations made between 21 and 14 days prior to the first day of the program will receive a 50% refund. No refund will be granted for cancellation made less than 14 days prior to the first day of the program.

For unlimited enrolment courses, registrants withdrawing over 72 hours prior to the course date will be refunded less a $50.00 administration fee. No refunds will be granted for cancellations made less than 72 hours prior to the course date.

Continuing Dental Education at The University of British Columbia reserves the right to cancel the course if deemed necessary by low enrolment, instructor cancellation or other unforeseen issues. In case of cancellation a full refund of registration fees will be issued.

‘Travel & Learn’, licensing and other select courses have individual refund policies. Please refer to each specific brochure for refund policies.

DISCLAIMER
Dental education institutions have an obligation to disseminate new knowledge related to dental practice. Some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by The University of British Columbia does not imply endorsement of a particular philosophy, procedure, or product by The University of British Columbia.

UBC CONTINUING DENTAL EDUCATION IS AN ADA CERP RECOGNIZED PROVIDER.
ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp.
FRIDAY - SUNDAY: SEPTEMBER 22 -24 &
THURSDAY - SUNDAY: NOVEMBER 2 -5

A Seven Day Hands-on Surgical Course
Drs. Ali Sadeghi, Kevin Aminzadeh and Tassos Irinakis of the West Coast Institute

This course will run over 2 sessions for a total of 7 full days of education and training. Mentors are Certified Specialists in Prosthodontics, Periodontics and Oral Surgery. Session 1 runs Friday to Sunday, September 22-24. Session 2 is four full days of hands-on training Thursday to Sunday, November 2-5.

COURSE HIGHLIGHTS INCLUDE:
- Two Days of Live Surgery by the CAD participants
- Each Participant will do up to 2 surgeries and observe/assist in several more
- One-On-One Supervision by a Specialist for each surgery
- Two Live Demo surgeries by our Oral Surgeon and Periodontist
- Full Treatment Planning of each case separately
- Computer Guided Implant Placement – a cornerstone of this course
- Use of Computer Guided Surgical Stent
- Patients offered to dentist participants from out of town or out of province

DR. ALI SADEGHI is a board-certified Oral and Maxillofacial Surgeon. He obtained his Doctorate of Medicine degree from Mount Sinai School of Medicine in New York City as part of his 6-year oral and maxillofacial residency training in the same hospital. He is currently the Department Head of Dentistry and Oral & Maxillofacial Surgery at Lions Gate hospital in North Vancouver and Assistant Clinical Professor at UBC Dentistry. Dr. Sadeghi lectures nationally and internationally on all aspects of Implant Surgery and has private practices in Vancouver and Port Coquitlam, BC.

DR. KEVIN AMINZADEH is a board certified Prosthodontist. He had a long dentistry career prior to attending the University of Michigan for his Dental Specialty degree. He is a key opinion leader in the field of implant and microscope enhanced dentistry and an international speaker on Implant and Esthetic Prosthodontics. He is the founder and director of Implant Genius, an implant treatment planning service utilizing computer guided technology. He serves the dental community as a Clinical Assistant professor at the Faculty of Dentistry, UBC. His state-of-the-art practice is situated in Vancouver, BC.

DR. TASSOS IRINAKIS is a Certified Specialist in Periodontics and one of the current leaders in comprehensive implant patient care and implant education for dental professionals. He served as the Director of the Graduate Periodontics & Implant Surgery program at the University of British Columbia for nearly a decade. Dr. Irinakis is an Associate Clinical Professor in the faculty of dentistry and has published several articles on implants and bone grafting in peer reviewed journals. He has lectured nationally and internationally and holds two private practices in Vancouver and Courtenay, BC.

TUITION
$6,995
Includes: Placement of up to 2 implants, Implant Genius Surgical Guide, breakfast, lunch and refreshments, instrument rental, all sundries required for your surgery(ies).

LOCATION:
The University of British Columbia
Nobel Biocare Oral Health Centre
2151 Wesbrook Mall, UBC
Vancouver, BC

REGISTER BY PHONE: 604 444-3131 OR EMAIL: INFO@WESTCOASTINSTITUTE.COM

LICENSING: As you will be working on live patients you are required to have a BC license. If you don’t hold a BC license, you will need to secure a temporary license from the College of Dental Surgeons of BC.

56 HOURS OF INSTRUCTION
Treatment Planning Implant Restorations for the Partially and Completely Edentulous Patient
Drs. Brian K.S. Kucey and Steven Sadowsky

This presentation will highlight the clinical experiences of 30 years of implant dentistry in a prosthodontist private practice. The first part of the presentation will be devoted to partially edentulous implant patients, with long term follow-up cases to illustrate the pros and cons of treatment decisions, complications, and their resolution. The second part will show long term results of complete arch implant treatments with discussion of maintenance, complications and resolution, and recommendations for current treatment planning and design. Discussions will include both the surgical and prosthetic aspects.

The best current evidence to support and discuss diagnosis, treatment planning, treatment completion, and present a protocol for maintenance of implant restorations will be interwoven with clinical cases.

FOR A MORE DETAILED COURSE SYNOPTIC, PLEASE VISIT WWW.DENTISTRY.UBC.CA/CDE

BRIAN K.S. KUCEY, BSC, DDS, MSED, CERT. PROS., CERT. MED. ED., FRCD(C), FACP, DIPLOMATE AMERICAN BOARD OF PROSTHODONTICS, completed his BSc and DDS at the University of Alberta. Following two years of private practice in Edmonton, he moved to Los Angeles where he completed his Certificate in Prosthodontics, MEd degree, and Certificate in Medical Education from the University of Southern California. He is a Diplomate of the American Board of Prosthodontics and a Fellow of the Royal College of Dentists of Canada. In 1991 he founded the Alberta Implant Seminar (AIS) mentoring program and continues as Director. Dr. Kucey is an Associate Clinical Professor at the University of Alberta, School of Dentistry. He has served at many levels of organized dentistry including Past-President of the Alberta Dental Association & College, the Edmonton & District Dental Society, and the Alberta Society for Dental Specialists and Councillor and Examiner of the Royal College of Dentists of Canada in Prosthodontics. Currently, he is Secretary of the Pacific Coast Society for Prosthodontics. He practices full time at South Edmonton Prosthodontics with his wife Dr. Elena Hernandez-Kucey at the Kucey Dental Group.

STEVEN SADOWSKY, DDS, is professor and director of implant education at the University of the Pacific Arthur A. Dugoni School of Dentistry. He was in full-time private practice limited to prosthodontics for 35 years. Dr. Sadowsky is Past President of the American Prosthodontic Society and president-elect of the Pacific Coast Society for Prosthodontics, as well as fellow of the Academy of Prosthodontics and the American College of Prosthodontics. He has directed the American College of Prosthodontics Annual Review Course for the last five years. In 1987 he became a diplomate of the American Board of Prosthodontists and has been invited to sit on the editorial review boards of The Journal of Prosthetic Dentistry, the International Journal of Oral and Maxillofacial Implants, and the International Journal of Prosthodontics. Dr. Sadowsky has published 20 articles in peer-reviewed journals, mainly on the topic of implant dentistry. He has edited a book titled, Evidence-based Implant Treatment Planning and Clinical Protocols which will be published by the end of the year.

TUITION: until Aug 21 after Aug 21
Dentists: $310 $345
RDHs & Dental Techs: $195 $215
CDAs: $175 $195

Includes: continental breakfast, luncheon, and all course handouts.

TIMES: Registration begins: 8:30 am
Course commences: 9:00 am

6 HOURS OF INSTRUCTION

LOCATION: The University of British Columbia
Lecture Hall #6, Instructional Resources Centre
2194 Health Sciences Mall
Vancouver, BC
A Comprehensive Review of Local Anaesthesia for Dental Hygienists

A two-day comprehensive review designed to teach and revisit basic and current concepts of local anaesthesia and administration of local anaesthetic agents. Come and participate in two full days that include lectures and an opportunity for hands-on practice of clinical techniques. Participants must be currently registered to practice in British Columbia. As participants practice on each other, you must be able to receive local anaesthesia or you must provide a stand-in for your partner.

COURSE OBJECTIVES:

Upon completion of this course, participants will be able to:

1. Describe head and neck anatomy related to the administration of local anaesthetic agents.
2. Describe principles of pharmacology related to local anaesthetic agents and adrenergic drugs.
3. Demonstrate the various techniques involved in the administration of local anaesthetic agents.
4. Explain patient evaluation, complications, and office emergencies as related to local anaesthesia.

REVIEW

Two full days consisting of didactic information, instruction, and application of clinical techniques.

TUITION:

Dental Hygienists: $695

Includes a non-refundable deposit of $295

TIMES:

Registration (Sept 23 & 24): 8:30 am

Lectures begin: 9:00 am

Includes: continental breakfast, lunch and handouts

14 HOURS OF INSTRUCTION

LOCATION:

University of British Columbia
Lecture Hall TBA
Instructional Resource Centre (IRC)
2194 Health Sciences Mall
Vancouver, BC

LIMITED ENROLMENT

A COURSE SCHEDULE AND PRE-READING PACKAGE WILL BE FORWARDED IN ADVANCE OF THE COURSE.

IMPORTANT:

If you are from out of province, it is your responsibility to make arrangements with the College of Dental Hygienists of British Columbia for a temporary practitioner permit in order to administer local anaesthetic agents during this course. All participants must hold college required insurance.

This course runs simultaneously with our licensing Local Anaesthesia for RDH’s, but does not require an exam for completion.
FRIDAY – SUNDAY: SEPT 29 - OCT 1, NOV 3 - 5, DEC 1 - 3

Certificate in Dental Practice Management

Building a Business Worth Smiling About

Dr. Jim Armstrong, Dr. Anthony Boardman, Dr. Mahesh Nagarajan, Dr. Tim Silk, Scott Sinclair, Dr. Daniel Skarlicki

As in all successful organizations, the efficient management of systems, costs and revenues is critical to success. For dental professionals, understanding how to manage these factors and improve customer retention through quality of care are key to developing a sustainable, patient-centric practice.

Designed and delivered by UBC Sauder professors and successful dental practitioners, and based on industry best practices and key measurements, the concepts and skills presented in this certificate program will help you work more effectively with your staff, streamline your systems and make smart decisions for the future.

FOR A MORE DETAILED COURSE SYNOPSIS, PLEASE VISIT WWW.DENTISTRY.UBC.CA/CDE

DR. JIM ARMSTRONG is the CEO of Aarm Dental Group. He is an MBA trained dentist through 2 MBA programs 12 years apart; and a past president of the BCDA. Jim serves on the Board of Directors for the Canadian Dental Association. Jim chairs the Economics Committee for the BCDA which produces the fee guide for the BCDA. His research and writing interests are in the areas of service marketing, econometric modelling, finance, and strategy/policy as it pertains to the dental profession.

DR. ANTHONY BOARDMAN is the Van Dusen Professor of Business Administration at the UBC Sauder School of Business. His interests include strategic analysis and implementation and the effects of ownership on performance. He teaches strategic analysis to business executives internationally, and serves as a consultant to organizations on strategic and economic issues.

DR. MAHESH NAGARAJAN is an Associate Professor and Chair of the Operations and Logistics Division at the UBC Sauder School of Business. He teaches supply chain management, applied game theory and inventory management in the MBA core, and has consulted for organizations such as Mattel and Boeing, as well as companies in healthcare and retail.

DR. TIM SILK teaches brand management, new product development and consumer behaviour at the UBC Sauder School of Business. His work focuses on consumer behaviour in pricing. An award-winning professor, he has taught at and consulted for companies including Bell, Best Buy and Visa. He is a leading expert on rebate promotions and has helped shape consumer-friendly policies for government agencies. Formerly, he was a marketing manager and a race car driver.

SCOTT SINCLAIR is a lecturer at the UBC Sauder School of Business. He has been actively involved in professional accounting education for more than 30 years. He was the principal author for the CA School of Business in Western Canada between 2000 and 2010, and has won multiple awards for teaching excellence. He has also worked for Coopers & Lybrand Chartered Accounts, serving small business and mining clients.

DR. DANIEL SKARLICKI is the Edgar Kaiser Professor and Chair of Organizational Behaviour at the UBC Sauder School of Business, where he also teaches marketing and behavioural sciences. He has taught executive programs in organizations across North and South America, Europe and Asia. His clients include Cathay Pacific, the Government of Canada, Vancity and Glaxo. An active educator, he has won numerous teaching and research awards.

Smile Design Excellence
Live Patient Hands-on Experience for the Entire Team
Dr. Wilson Kwong

- How do you design smiles with beauty and functionality in mind?
- How do you integrate your team into a smile design process to maximize patient comfort & satisfaction?
- What are the core principles you need to know before you plan your case?
- How can you test your designs to guarantee success?

Answer these critical questions and more in VDEC’s life-changing 4-day, hands-on smile design course for experienced and aspiring dentists alike! Specially designed to transform your whole team into smile design experts, each registration fee includes one dentist and three dental team members. Bring a real patient case from your practice to our 4-day, live-patient course. Develop your eye for esthetic excellence along with all the diagnostic fundamentals, techniques and core principles you will need to achieve full and effective case acceptance. Join VDEC for some serious fun! Discover how to help your patients realize their lifelong dream of having a beautiful, healthy smile without any pain or physiologic compromise.

At the end of this course participants will be able to:
- Plan a real case from your own practice and make wise decisions with confidence and precision within a supportive, collaborative environment.
- "Pre-prep" for your case, discuss it with others, considering a variety of different preparation designs, and prepare a model using temporaries to transform a single unit into a beautiful smile.
- Integrate your whole team into all your smile design cases, including a positive philosophy, practical concepts and risk management strategies.

WILSON J. KWONG, DMD, FACD, VDEC FOUNDER founded VDEC out of his passion for continuing education. His teaching methodology is practical, interactive and career-changing. Each of his carefully-designed modules promises a progressive learning experience that combines sound dental science and hands-on techniques with solid business acumen. A graduate of the Faculty of Dentistry at UBC, Dr. Kwong has been practicing and teaching leading-edge dental techniques worldwide for over 28 years. A lecturer for Nobel Biocare and Ivoclar throughout North America, Dr. Kwong offers insights into Platinum case presentation, esthetic implant restoration, ceramics and bonding procedures. Dr. Kwong is also a recent recipient of a Fellowship with the American College of Dentists.

Tuition: until May 10 after May 10

Dentists: $3095 $3495

Live Patient, Hands-on (plus lab fees for 1 dentist +3 team members). Please note that participants are requested to bring their own patient.

Includes: coffee breaks, lunches, and handouts.

Registration Deadline: August 31, 2017

Times: Course Hours: 8:00 am - 4:00 pm

Day 1 Lecture: Robert H. Lee Alumni Centre, Jack Pool Hall at UBC, 6163 University Blvd

Day 2 Prep: Nobel Biocare Oral Health Centre Dental Clinic, 2151 Wesbrook Mall, UBC

Day 3 Lecture: Robert H. Lee Alumni Centre, Jack Pool Hall at UBC, 6163 University Blvd

Day 4 Seat: Nobel Biocare Oral Health Centre Dental Clinic, 2151 Wesbrook Mall, UBC

Licensing: As you will be working on live patients you are required to have a BC license. If you don’t hold a BC license, you will need to secure a temporary license from the College of Dental Surgeons of BC.

32 Hours of Instruction
LIMITED ENROLMENT

SATURDAY, OCTOBER 21

Medical Emergencies in the Dental Office

Dr. David Isen

As dental practitioners, we must be continually prepared to effectively manage a medical emergency. Our patients rely on our ability to do so. This however may lead to a difficult predicament because thankfully, dentists encounter medical emergencies infrequently. We therefore may not be proficient in handling these situations since we are not practiced in doing so.

This course will review methods of reducing the likelihood that a medical emergency will occur by learning how to predict who may have a medical emergency and what that emergency is likely to be. As well, the use of emergency drugs will be discussed along with a discussion regarding the newest (as of November 2015) protocols for basic cardiac life support and the use of an automated external defibrillator. Finally, some specific emergencies will be reviewed and suggestions as to how to organize an emergency kit, so as to be prepared even months down the road, will be provided.

LEARNING OBJECTIVES:

• Identify how to reduce the risk of a medical emergency.
• How to assess vital signs and understand what they mean.
• An understanding of the new basic life support protocols.
• Learn which drugs are appropriate for a dentist to stock in a medical emergency kit.
• How and when to use medical emergency drugs.
• How to manage specific medical emergencies for example syncope, hypoglycemia, stroke, myocardial infarction, cardiac arrest, asthma, local anaesthetic overdose, seizure and allergy.

This course is suitable for dentists, hygienists and assistants.

DAVID ISEN, BSC, DDS, FADI

David’s dental clinic is an anaesthesia-based practice in Toronto treating patients who require intravenous sedation or advanced techniques in local anaesthesia. Many of these people have special medical needs or are dental phobic. David is the immediate past president of the Ontario Dental Society of Anesthesiology. As a lecturer, he has presented numerous lectures for both Western University’s and University of Toronto’s Continuing Education Program. David has given over three hundred presentations throughout North America and around the world on topics related to local anaesthesia and medical emergencies in the dental office. He is a Fellow of the Academy of Dentistry International, The International College of Dentists and The Pierre Fauchard Academy. David is the author of numerous journal articles. He also has peer-reviewed articles for a variety of dental journals and as well has acted as a consultant for dental and pharmaceutical companies.

TUITION:  
until Sept 22  after Sept 22
Dentists:  $350  $385
Dental Hygienists:  $195  $215
Dental Technicians:  $195  $215
CDAs:  $175  $195

Includes: continental breakfast, luncheon, handouts plus the Lighthouse Emergency Kit which has been designed for emergency preparedness in the general dental practice.

TIMES:

Registration begins:  8:30 am
Course commences:  9:00 am

6 HOURS OF INSTRUCTION

LOCATION:

The University of British Columbia
Lecture Hall #TBA
Instructional Resource Centre (IRC)
2194 Health Sciences Mall
Vancouver BC

The Lighthouse kit is user friendly, organized and ready with today’s standard of care, regulations and are consistent with guidelines.

Kit available to dentists only
Mastering Adult Minimal Sedation: Inhalation and Oral Sedation in Dentistry
Drs. Jason Goodchild, Mark Donaldson, & Scott Dickinson

This two part, three day hands-on course offers instruction in all aspects of nitrous oxide/oxygen inhalation, including effective methods in dealing with anxiety control in general practice. Participants will learn various techniques and will have the opportunity to try several types of systems.

Part 1 (Friday and Saturday) is designed to achieve certification in nitrous oxide/oxygen sedation and Part 2 (Sunday) is designed for those who have successfully completed Part 1 or have previously completed a certification course in nitrous oxide/oxygen sedation (documentation required) or have completed an undergraduate program, and focuses on minimal oral sedation.

PART 1  FRIDAY AND SATURDAY, OCTOBER 20 - 21
This course will include hands-on administration of nitrous oxide using various techniques, machines, and equipment.

- Clinically-Useful Pharmacology
- Patient Assessment and Risk Management
- Applied Physiology and Anatomy of Respiration
- Nitrous Oxide and Oxygen Pharmacology
- Indications and Contraindications for the Use of Nitrous Oxide
- Nitrous Oxide Equipment: Plumbed and Portable
- Incremental and Rapid Induction Administration Techniques
- Nitrous Oxide Contamination and Scavenging: When Fail-Safe Isn’t Safe
- Keeping Patients Safe: Monitoring
- Keeping Patients Safe: The Dental Emergency Kit
- Tips and Tricks for Additional Pain and Anxiety Control
- Avoiding Drug Interactions

PART 2  SUNDAY, OCTOBER 22
This two part course is designed to meet the criteria, standards and guidelines of the College of Dental Surgeons of British Columbia, the Alberta Dental Association and College, Royal College (Ontario) the American Dental Association, and the Association of the Canadian Faculties of Dentistry, for the teaching and administration of nitrous-oxide and oral sedation.

A short examination is required to successfully meet these requirements.

PRE-REQUISITE: PART 1 OR EQUIVALENT

- Pharmacology of Oral Sedatives and Their Utilization with Nitrous Oxide
- Minimal Oral Sedation Protocols and Patient Management
- Beyond Sedation: Appropriate Analgesic Prescribing
- Beyond Sedation: How Sedation Can Improve Your Local Anesthesia Success
- Beyond Sedation: Pain Mechanisms and Appropriate Analgesic Prescribing
- Beyond Sedation: Local Anesthesia Update
- Keeping Patients Safe: Flumazenil & Naloxone
- Minimal Sedation Regulations and Other Regulatory Considerations

We encourage the whole team to participate in this course, but only the dentist is eligible for certification.
JASON GOODCHILD, DMD is a graduate of Dickson College in Carlisle, Pennsylvania. He received his dental training at the University of Pennsylvania, School of Dental Medicine, where he maintains a faculty position as Clinical Associate Professor in the Department of Oral Medicine. Dr. Goodchild is also Clinical Assistant Professor in the Division of Oral Diagnosis, Department of Diagnostic Sciences, New Jersey Dental School, and has a practice in Havertown, Pennsylvania. He has published numerous articles and spoken to many State Dental Boards on the topic of enteral sedation dentistry. Dr. Goodchild has been an invited speaker for the Academy of General Dentistry and American Association for Dental Examiners. He is a reviewer for the Journal of the American Dental Association, General Dentistry, and Quintessence International, and has served as a grant reviewer for the National Institute of Health.

MARK DONALDSON, BSP, RPH, PHARMD, FASHP, FACHE received his baccalaureate degree from the University of British Columbia, and his Doctorate in Clinical Pharmacy from the University of Washington. He has further completed a residency at Canada’s largest tertiary care facility, Vancouver General Hospital, and is the current Director of Clinical Pharmacy Performance Services for Vizient, living in Whitefish, Montana. Dr. Donaldson is a Clinical Professor in the Department of Pharmacy at the University of Montana in Missoula, and Clinical Associate Professor in the School of Dentistry at the Oregon Health & Sciences University in Portland, Oregon. He has a special interest in dental pharmacology and has lectured internationally to both dental and medical practitioners. He has spent the last eighteen years focusing on dental pharmacology and the art of dental therapeutics, and has become a leader in this field of study. Dr. Donaldson has a number of published works in the peer-reviewed literature and spent three years in Japan centering on cross-cultural communication and internationalization. He currently serves on the Editorial Board for the Journal of the American Dental Association, and is board certified in healthcare management.

SCOTT C. DICKINSON, DMD received his undergraduate degree from St. Lawrence University and his dental degree from the University of Pennsylvania, School of Dental Medicine. After graduation he completed an AEGD while serving in the U.S. Army. During this time Dr. Dickinson received training on and regularly used nitrous oxide and oxygen, oral, and intravenous sedation techniques. During his service in the Army he performed the duties of both a flight surgeon and a general practicing dentist. After leaving the Military he entered private practice where he served as the Vice President of Clinical Support for Aspen Dental Management. In this role he was responsible for the training, new dentist orientation, and continuing education needs of both the company and the over 700 doctors it associates with. He now maintains an active general dental practice in Pensacola Florida where he regularly uses sedation techniques to more comfortably treat his patients.

Posterior Composites:
A Rapid, Simplified Placement Technique
A Lecture, Demonstration and Participation Course

Dr. Ronald Jackson

Posterior composite resin restorations have become mainstream. These restorations seal teeth, reinforce remaining tooth structure, allow conservative preparations and satisfy patient desires for natural appearance. However, dentists complain that Class II composite restorations are tedious, time consuming, somewhat complicated, and aren’t always predictable. In addition, clinicians can sometimes be confused by the vast choice of adhesives in the marketplace all claiming to be the best and report frustration whenever a Class II contact is too light or missed altogether.

In this presentation, Dr. Jackson will show a greatly simplified and efficient procedure for placing posterior composite restorations based on new materials and technology. The predictable, standardized protocol will clearly show a significant reduction in both time and effort when placing these restorations. Additional topics covered include:

- Matricing – achieving proper contacts every time
- Understanding Adhesives and Adhesion – an update
- Total adaptation, total fill - in seconds

LEARNING OBJECTIVES:
1. To examine current matricing techniques that ensure predictable quality contacts
2. To understand Adhesion – making the right choice and doing it right
3. To achieve time savings without compromise, using bulk fill composite technology

PARTICIPATION:
Following the lecture, participants will have the opportunity to place a Class II composite restoration using SoniFill™ (Kerr). Dentists will discover that this system delivers a fast, easy and efficient single fill aesthetic restoration with high density and adaptation.

RONALD JACKSON, DDS, FACD, FAGD, FAACD is a 1972 graduate of West Virginia University School of Dentistry. He has published over 80 articles on esthetic, adhesive dentistry and has lectured extensively across North America and abroad. Dr. Jackson has presented at all the major U.S. scientific conferences as well as to Esthetic Academies in Europe, Asia and South America. He is a Fellow in the Academy of General Dentistry, a Fellow in the American Academy of Cosmetic Dentistry and a Diplomate in the American Board of Aesthetic Dentistry. Dr. Jackson practices in Middleburg, Virginia emphasizing comprehensive restorative and cosmetic dentistry.

Instructional Resources Centre (IRC) 2194 Health Sciences Mall Vancouver, BC
Soft Tissue grafting is now a necessity in various stages of a dentist’s treatment plan. Soft tissue enhancement prior to Orthodontic treatment or Prosthodontic rehabilitation offers a safer and more stable long term result. Bone grafting surgery sites are poorly planned without the existence of strong keratinized gingiva. The benefits of having resistant keratinized tissues around implants and implant supported crowns are well documented. Root coverage procedures allow you to offer your patients different options to address root sensitivity, aesthetic concerns, abrasions and abstractions.

This course introduces the participants to various aspects of soft tissue grafting and periodontal plastic surgery. Topics covered will include autogenous connective tissue grafts (CTGs), autogenous free gingival grafts (FGGs), utilizing allograft materials from the market, pedicle flaps, etc. An emphasis is placed on treatment planning and patient selection criteria through evidence based lectures and handouts.

There will be two live demo surgeries by the Course Mentors on their patients along with the opportunity to practice various grafting techniques on animal mandibles. On Saturday please bring your loupes and lab coat.

TASSOS IRINAKIS, DDS, MSC, DIP.PERIO, FRCD(C), received his Specialty diploma and Master’s degree at The University of British Columbia. Dr. Irinakis is an Associate Clinical Professor at the Faculty of Dentistry at UBC. He served as the Director of the Graduate Periodontics & Implant Surgery program for nearly a decade. Dr. Irinakis is a reviewer for the Journal of Periodontology and Oral Surgery and serves as a member of the editorial advisory board for the Journal of Implant & Advanced Clinical Dentistry and the Journal of Clinical and Practical Implantology. He is a Fellow of the Royal College of Dentists of Canada and a member of numerous professional organizations. He has conducted clinical research on Implants & Sinus Bone Grafting and has authored several scientific articles on these topics. He lectures nationally and internationally with focus on Advanced Bone Grafting and Aesthetic Periodontal & Implant Dentistry. He holds private practices in Vancouver and Courtenay, BC.

FARZAN GHANNAD, DDS, MSC, DIP.PERIO, FRCD(C), is a certified specialist in Periodontics and received his Specialty Diploma and Masters degree from The University of British Columbia (UBC). He completed his dental degree in Heidelberg, Germany and has conducted research and published in the field of Implant Dentistry. He is a Fellow of the Royal College of Dentists of Canada and member of numerous professional organizations. Dr. Ghannad is an Associate Clinical Professor at the Faculty of Dentistry at UBC and lectures nationally on all aspects of periodontal therapy, including soft tissue grafting, regeneration, and implant dentistry. He practices in Vancouver, North Vancouver, BC as well as Saskatoon, SK.
Introduction to Dental Microscopy and Advanced Endodontics: 
A Two-Day Hands-On Workshop 
Dr. Jeffrey M. Coil

A stimulating two-day course combining the most current technological methods for endodontics and the fundamentals of clinical microscopy for dentistry. Participants will focus on clinically relevant information that is needed to provide successful advanced procedures for restorative and endodontic procedures, and use that information as they perform their dentistry with the aid of the dental operating microscope (DOM). Participants will learn the requirements for incorporating the DOM into their daily dental practice and perform psychomotor skills including tooth preparations, endodontic access, instrumentation obturation, and retreatment on extracted teeth. Novel Nickel Titanium rotary files, irrigation devices, and ultrasonic uses in endodontics will be presented.

Upon completion of this course participants will be able to:

1. Par focal a Dental Operating Microscope quickly and correctly.
2. Move freely between most or all magnification levels and know which levels of magnification are best for each situation.
3. Effectively and efficiently move throughout the maxillary arch using direct and reflected vision.
4. Effectively and efficiently move throughout the mandibular arch using direct and reflected vision. The achievement of this goal may be more challenging for some participants, but will come with time and experience.
5. Comfortably perform endodontic access preparations in all six sextants of the mouth at 2.1x to 12.8x magnification.
7. Master the ergonomics of working under magnification.
8. Preform endodontic access cavity preparation under magnification.
9. Utilize ultrasonics to refine access cavity preparation, remove canal obstructions.
10. Instrument and obturate single rooted and multrooted tooth under magnification.
11. Perform endodontic retreatment under magnification.

Please bring at least 2 teeth with no prep.

JEFFREY M. COIL, DMD, MSD, PHD, FRCD(C), FADI, received his undergraduate, dental and doctorate degrees from the University of British Columbia. He practiced general dentistry for eight years and was a Clinical Instructor in Endodontics and Periodontics, before obtaining his certificate in Endodontics at the University of Washington in 1993. Dr. Coil is a Diplomate, American Board of Endodontics. He serves as an editorial consultant for the Journal of the Canadian Dental Association and on the Scientific Advisory Board for the Journal of Endodontics. He is a Past President of the Canadian Academy of Endodontics, and is a member of the British Columbia Society of Endodontists and the American Association of Endodontists. Dr. Coil is the mentor of the Northwest Endodontic Study Club and Seminar, and is currently the Director of the Graduate Endodontics Program, Department of Oral Biological and Medical Sciences, University of British Columbia, Canada.

TUITION:  
until Oct 8  $1050  after Oct 8  $1125

Includes: continental breakfast, lunch, and all course handouts.

TIMES:  
Course Registration: 8:30 am  
Course commences: 9:00 am  
Saturday November 18 9 am – 5 pm  
Sunday, November 19 9 am – 3 pm
SATURDAY, NOVEMBER 25  DE 9390

Fundamental Principles of Periodontal Instrumentation
Penny Hatzimanolakis

This full day seminar and hands-on clinical simulation session is intended for registered dental hygienists and will focus on improving fundamental principles of non-surgical periodontal instrumentation from knowledge translation to clinical hands-on activities. The session’s activities will enhance your skill set and provide you the confidence to care for the more complex periodontal client. The full day will provide knowledge on innovative instrument designs and solution driven approaches to meet the inevitable challenges of mechanical periodontal instrumentation for powered and non-powered instruments.

FULL DAY LEARNING OBJECTIVES:
• Understanding the complexity of Oral Biofilm Management.
• Outlines the ADPIE Process of Care Module for Periodontal Care Plans.
• Identify the objectives of periodontal debridement.
• Determine what is Clinical versus Therapeutic end-point.
• Demonstrates the fundamental principles of instrumentation.
• Recognize the instrument design, indications and sequence for use of instruments (powered or non-powered).
• Describe the differences between magnetostrictive and piezoelectric units as well as inserts/tips design.
• Analyzes ergonomics and positioning to increase instrumentation effectiveness and efficiency, especially with high volume evacuation.
• Review fundamental principles of sharpening and honing techniques.
• Identify new trends with non-surgical periodontal Instrumentation.

PENNY HATZIMANOLAKIS, RDH, B.SC, M.SC, is a Clinical Associate Professor at the University of British Columbia involved in graduate (Perio) and undergraduate Dental (DMD) and Dental Hygiene Degree (DHDP) Programs. She chairs the DHDP Admissions Committee and is also a Faculty Advisor. She was awarded the Part-Time Faculty Teaching Award in 2012.

As a researcher, she focuses on periodontal disease, the use of photodynamic/photodisinfection therapy, implants and oral self-care. She has published and co-authored in multiple journals and webinars.

As a clinician, she has been practicing with a periodontal/prosthetic specialty team for the last 17 years. In addition, she created a consulting company, UpScale Consulting, to assist Dental Hygienists and their teams to achieve the highest standard of care.

As part of the dental community, Penny has sat on the Organizing Committee for the Pacific Dental Conference (scientific conference) since 2007 as a representative for the British Columbia Dental Hygienist Association. She also leads a study club, which is affiliated with VIP and The Seattle Study Club.

FULL DAY COURSE: 9 AM – 4 PM
Open to RDHs only
Includes: morning lecture, afternoon workshop, breakfast, lunch and handouts.
6 HOURS OF INSTRUCTION (Limited Enrolment)

MORNING ONLY COURSE: 9 AM – NOON
Open to all dental professionals
Includes: lecture, breakfast and handouts
3 HOURS OF INSTRUCTION (Unlimited Enrolment)

TUITION:
until Oct 6 after Oct 6
Full Day Course(RDHs) $205 $225
Morning Only Course $150 $170

LOCATION:
The University of British Columbia
Nobel Biocare Oral Health Centre
2151 Wesbrook Mall
Vancouver BC

FULL DAY REGISTRANTS WILL RECEIVE A COMPLIMENTARY SELECT INSTRUMENT.
Clinical Hypnosis in Dentistry:
Practical Rapid Induction Techniques for Dentists
Dr. Lance Rucker

The dental profession is well-suited to clinical hypnosis. Within dentistry, hypnosis has both therapeutic and operative uses, including elimination of dental phobias and anxiety, adjustment of gag reflex, behaviour modification (such as thumb sucking/bruxism), control of hemorrhage, and control of salivary flow. Hypnosis has been endorsed for over 50 years as a basic standard patient care technique by the American Dental Association and by the Canadian Dental Association.

A ‘light’ state of hypnosis is easy and quick to achieve, and is most commonly used in dentistry on a day-to-day basis to empower patients, eliminate anxiety, reduce gag reflex, control and reduce gingival bleeding during basic restorative procedures, and to reduce the isometric tensing of the muscles of the jaw and thereby to reduce tenderness of the jaw during and after appointments. Hypnotic techniques are especially effective for the pediatric patient, and can also be used in conjunction with inhalation sedation.

This course will involve extensive hands-on opportunities for all participants. Hypnosis theory will be interspersed with formal inductions and opportunities for each participant to experience both performing and receiving trance inductions. During the afternoon, rapid induction techniques will be demonstrated and experienced in the UBC dental clinic, along with more traditional hypnotic inductions, directed specifically toward reduction of gag reflex, modification of pulse rate, adjusting comfort level with needle insertions, etc.

This course will be led by Dr. Lance Rucker. As required and depending on the course numbers Dr. Rucker may be joined by his colleagues Dr. Wong and Dr. Kuttner of the Canadian Society of Clinical Hypnosis (BC).

LANCE RUCKER, DDS, FACD is the current President of the Canadian Society of Clinical Hypnosis (BC). Dr. Rucker has been a member of the Faculty of Dentistry of the University of British Columbia for 34 years, where he has taught clinical ergonomics, operative dentistry, and clinical hypnosis in both graduate and undergraduate programs.

He has published articles in JADA, JDE, and the CDA Journal and has taught physicians, dentists, and other health care professionals in North America, Europe, and Asia how to use hypnosis with patients of all ages.

DR. DAVIDICUS WONG is a graduate of the UBC Medical School where he has an appointment as Clinical Assistant Professor. He has taught rapid-induction clinical hypnotic techniques for dentists and physicians with the Canadian Society of Clinical Hypnosis since 2014. He integrates clinical hypnosis, mindfulness, and CBT in his full service family practice with obstetrics.

DR. LEORA KUTTNER, PH.D. is a registered psychologist in private practice. She is a Clinical Professor at B.C. Children’s Hospital and has been teaching clinical hypnosis as part of the UBC Pediatric Graduate Dental program for seven years. In addition to a long list of articles published in scientific journals, Dr. Kuttner has published the book: “A Child in Pain: What Health Professionals Can Do to Help.” She also has written and produced several films featuring clinical hypnosis in pediatric care both in the hospital and on an outpatient basis, including the award-winning documentary film “No Fears, No Tears,” which includes actual footage of the use of clinical hypnosis for children with cancer as they undergo extensive and otherwise painful tests and treatments.

TUITION: until Oct 23 after Oct 23
Dentists: $400 $440
Includes: continental breakfast, lunch, course handouts and a clinical hypnosis DVD produced by the Canadian Society of Clinical Hypnosis.

TIMES:
Registration begins: 8:30 am
Course commences: 9:00 am

6 HOURS OF INSTRUCTION

LOCATION:
The University of British Columbia
Instructional Resource Centre (IRC)
2194 Health Sciences Mall and the Nobel Biocare Oral Health Centre, UBC
Vancouver, BC
TRAVEL & LEARN PROGRAMS 2018

Adventure and Learn
MAUI, HAWAII
January 29 – February 2, 2018
Fairmont Kea Lani Resort
Dr. Chris Wyatt, “Aesthetics & Functions of Ceramic Restorations”
Dr. Jonathan A. Ng, “Digital Dentistry”
Dr. Jeffrey Coil, “Endodontics: Contemporary Root Canal Instrumentation and Obturation”

Annual Ski Seminar
WHISTLER, BC
February 8 – 10, 2018
Four Seasons Resort
Dr. Manor Haas, “Advances & Controversies in Endo You Should Know” and “Endo vs. Implants: To Save or Not to Save (Why and How)”

Dental Practice Transition Seminar and Golf Weekend
PALM SPRINGS, CA
February 22 – 25, 2018
Omni Rancho Las Palmas Resort & Spa Rancho Mirage, California

Adventure and Learn
UBC Orthodontic Symposium
BIG ISLAND, HAWAII
March 26 – 30, 2018
Fairmont Orchid Resort
Dr. Sandra Tai, “Expanding Treatment Options with Invisalign”
Dr. Lucia Cevidanes, “Advances in CBCT Imaging from the Airway to TMJ”
Dr. Anthony DiAngelis, “Managing the Unexpected Dental Injury (Part 1 & 2)”

FOR MORE INFORMATION, PLEASE VISIT WWW.DENTISTRY.UBC.CA/CDE
SEPTEMBER 2017 – JULY 2018 DE 9160
Radiant Advanced Orthodontic Study Club
Dr. Paul Witt

LIMITED ENROLMENT: 8 PARTICIPANTS
This course provides instruction in diagnosis, treatment planning, and practical experience in comprehensive orthodontic treatment procedures for general practitioners who already have some familiarity with orthodontics. Participating doctors will provide their own patients and should be prepared to present treatment proposals for group discussions with Dr. Witt and the other participants. While it is not necessary, especially initially, that participants orthodontically treat patients, it is anticipated that most participants will choose to become involved in clinical treatments eventually. For those choosing to treat patients, regular attendance at most monthly sessions is necessary to maintain proper continuity of treatment.

TUITION FEE:
Dentists $4,100
Includes breakfast and course materials. Expendable supplies are not included in the course fee.

A non-refundable deposit of $995 is due upon registration.

FRIDAY OR SATURDAY MORNINGS,
8:00 AM – 1:00 PM
55 HOURS OF INSTRUCTION

LOCATION:
Radiant Orthodontics
201 – 4906 Delta Street
Delta, BC
Phone: 604.946.9771
Please see page 23 for map

SEPTEMBER 2017 – JULY 2018 DE 9130
Basic Orthodontics for the General Practitioner
Dr. Paul Witt

LIMITED ENROLMENT: 10 PARTICIPANTS
This course provides instruction in orthodontic examination, diagnosis, and treatment-planning with emphasis on the goals, objectives, and realistic expectations of orthodontic treatment. Didactic instruction will be supplemented with clinical demonstrations, treatment case examples from a broad practice data-base, and “hands-on” experiences.

TUITION FEE:
Dentists: $3495.00
Includes light lunch for each session and course handouts. Expendable supplies are not included in the course fee.

A non-refundable deposit of $695 is due upon registration.

FRIDAY AFTERNOONS:
1:15 – 6:15 PM
55 HOURS OF INSTRUCTION

LOCATION:
Radiant Orthodontics
201 – 4906 Delta Street
Delta, BC
Phone: 604.946.9771
Please see page 23 for map

FOR FURTHER INFORMATION AND DATES PLEASE VISIT WWW.DENTISTRY.UBC.CA/CDE
STUDY CLUBS STARTING FALL 2017

Pre-Registration is required for Study Clubs.

SEPTEMBER 2017 – AUGUST 2018  DE 9131
Advanced Orthodontics for the General Practitioner
Dr. Benjamin Pliska

LIMITED ENROLMENT: 9 PARTICIPANTS

This course provides detailed instruction in diagnosis, treatment planning, and specifics of treatment procedures for general practitioners who already have some familiarity with orthodontic procedures. It is emphasized that these sessions provide practical experience, on an ongoing basis, with the practitioner’s own patients. This course is not limited to theoretical concepts and laboratory procedures. Case presentations and discussions on treatment planning will be held at each session and will supplement clinical treatment of patients.

TUITION FEE:
Dentists: $3650.00

Refreshments and light snacks are included in each session. All necessary instruments, equipment and expendables are provided, and are included in the course fee. Brackets, bonds, archwires etc. are extra and are billed quarterly throughout the year. Includes breakfast and course materials. Expendable supplies are not included in the course fee.

A non-refundable deposit of $800 is due upon registration. A $300 deposit for supplies is required in September 2017.

THURSDAY PM: 1:00 PM - 6:00 PM
FRIDAYS OR SATURDAYS 8:00 AM - 1:00 PM

60 HOURS OF INSTRUCTION

LOCATION: The University of British Columbia Sutherland Clinic JB Macdonald Building 2199 Wesbrook Mall, Vancouver, BC

FOR FURTHER INFORMATION AND DATES PLEASE VISIT WWW.DENTISTRY.UBC.CA/CDE

OCTOBER 2017 – MAY 2018  DE 9132
Advanced Fixed Prosthodontics for the General Practitioner PART II
Dr. Chris Wyatt

LIMITED ENROLMENT: 12 PARTICIPANTS

These seminar based study clubs will explore diagnosis and treatment planning and various fixed prosthodontic options to restore individual teeth and the partially edentulous patients. The topics will include occlusion, materials, and procedures from ceramic veneers to long-span bridges. Each 3 hour session will be broken down into a two-hour seminar and a one-hour case review. Participants will be encouraged to present interesting cases for discussion with the group. A closing dinner in May is a highlight of this Study Club.

TUITION FEE:
Dentists: $2295.00

Includes course materials, a light meal each evening, and the closing dinner

A non-refundable deposit of $395 is due upon registration.

THURSDAY EVENINGS: 6:30 - 10:00 PM

28 HOURS OF INSTRUCTION

LOCATION: Suite 1403 805 West Broadway Vancouver BC V5Z 1K1
Ready for more than your typical weekend warrior implant course? Want to expand your understanding of implant dentistry, and practice what you learn? Join us!

The AAID Vancouver MaxiCourse provides 300 hours of continuing dental education in implant dentistry. It combines the best of both worlds – outstanding didactic sessions presented by internationally acclaimed practitioners, and 14 days of hands-on surgical experience on YOUR patients that are mentored by board-certified oral implantologists. In addition, a thorough review of surgical anatomy emphasizes and reinforces the practical application of surgical anatomy in oral implantology, with hands-on cadaver exercises.

Is it time to take your implant practice to the next level?

OVERVIEW

• Systematic approach to learning implant dentistry.
• Review physiology, pharmacology, and medical management of patients.
• Exposure to the broad spectrum of Oral Implantology – beyond root forms.
• Learn diagnostic and treatment planning algorithms.
• Sharpen restorative, surgical and periodontal skills.
• Attain clarity in where dental implant services fit into your practice.
• Connect with a support team and gain camaraderie with other dentists.
• Provide dental implant services in a safe, effective, and profitable manner.
• Option to be recognized (Credentialed) by writing the Associate Fellowship Exam Part A.

COURSE DIRECTOR

Dr. William Liang, Diplomate, American Board of Oral Implantology

For further course details including course overview, distinguished speakers list, tuition and location, please visit: www.dentistry.ubc.ca/cde/ce-partners/ or www.vancouvermaxicourse.com

North America and Internationally Licensed Dentists are able to apply for temporary permits and insurance. This will enable participants to perform surgery on patients in British Columbia, Canada. Please contact Andrew for further information.

TUITION:

$24,000 CAN
Non-refundable deposit for registration: $5000
Tuition includes one year membership in AAID. Surgical sundries fees will be additional.

LOCATION:

The University of British Columbia Nobel Biocare Oral Health Centre, 2151 Wesbrook Mall Vancouver, BC

Moderate Conscious IV Sedation for Dentistry

FALL 2017

This course is designed to prepare the dentist to incorporate moderate intravenous sedation into their dental practice. It is a comprehensive program consisting of a minimum of 70-75 hours of didactic classroom time, and the direct participation in a three day clinical rotation.

LEARNING OBJECTIVES

- Review of cardiovascular and respiratory physiology
- Review of sedation pharmacology
- Review of provincial sedation guidelines
- Patient assessment for safety and appropriateness of IV sedation
- The delivery of sedation in your setting
- Keeping our patients safe: patient monitoring and record keeping
- The sedation team and the set-up of your office
- Pediatric sedation considerations
- Hands-on venipuncture techniques
- Hands-on review of nitrous oxide system use
- Hands on training to respond to office medical emergencies
- The Six Second ECG- ECG interpretation for dentists
- ACLS: Advanced Cardiac Life Support for Dentists
- Basic and advanced airway management training

For further course details, including a detailed course overview, location and tuition, please visit: www.dentistry.ubc.ca/cde/ce-partners/ or www.dental-ed.ca

Contact Info:
Michael Dare, 1-778-984-0915

NDEB CLINIC EXAMINATION CANDIDATE ORIENTATION

The University of British Columbia is not affiliated, associated, authorized, endorsed, sponsored or supported in any way by the National Dental Examining Board of Canada. Test names and other trademarks such as “NDEB”, “BNED”, logos and design marks, and service marks are the property of the NDEB and not trademarks of the University of British Columbia.

FORMAT: TOTAL OF 3 HOURS / 6PM - 9PM, THURSDAY NOVEMBER 30

- Tour of Facility
- Chair Demonstration and familiarization with dental unit
- Scheduled time alone to practice skills

Please be advised that this is a clinic orientation only, it is designed for you to familiarize yourself with the clinic setting. No Guidance or Advice will be given regarding the assessment.
DIRECTIONS TO UBC CAMPUS AND MAPS

DRIVING FROM VANCOUVER INTERNATIONAL AIRPORT:

From the airport, follow the signs to Vancouver. Take the SW Marine Drive exit on the north side of the Arthur Laing Bridge. Turn left on West 70th Avenue. West 70th Avenue becomes SW Marine Drive. Follow SW Marine Drive for approximately 15 km (10 miles). From SW Marine Dr, turn right onto West 16th Avenue. Follow West 16th Avenue for about two blocks and turn left onto Wesbrook Mall. Continue along Wesbrook Mall until you reach Gate 11. Turn left at Gate 11 onto Thunderbird Boulevard. Turn right onto Health Sciences Mall. Continue for two blocks and turn left at 3-way stop. The Parkade is on your immediate right. The Instructional Resources Centre (Woodward/IRC) Building is immediately east of the Parkade. The J.B. MacDonald Building and the Nobel Biocare Oral Health Centre are just east of the IRC Building.

DRIVING FROM DOWNTOWN:

Take either Granville or Burrard Streets, and turn right (west) onto 4th Avenue. Follow 4th Avenue westbound for approximately 5km (3 miles), until it turns into Chancellor Boulevard. Turn left onto Wesbrook Mall and continue along Wesbrook until you reach Gate 11 (second set of lights). Turn right at Gate 11 onto Thunderbird Boulevard. Turn right onto Health Sciences Mall. Continue for two blocks and turn left at 3-way stop. The Parkade is on your immediate right. The Instructional Resources Centre (Woodward/IRC) Building is immediately east of the Parkade. The J.B. MacDonald Building and the Nobel Biocare Oral Health Centre are just east of the IRC Building. Due to construction on campus, these directions may change slightly – please watch for signs. We apologize for any inconvenience.

JUNE 2018
CAST GOLD RESTORATION
Dr. Margaret Webb

One of Continuing Dental Education’s oldest courses, the flagship Cast Gold Restoration Course is an intensive participation course on cast gold procedures using techniques developed by Dr. R.V. Tucker. Each day features lectures followed by hands-on clinic procedure. Participants will work on individual patient cases and will also gain an in-depth understanding of laboratory procedures.

MAY / JUNE 2018
ORTHODONTIC MODULE
Dr. Paul Witt

The University of British Columbia has been proudly offering the Orthodontic Module for Certified Dental Assistants and Registered Dental Hygienists since 1979. This advanced training program in Orthodontics enables Certified Dental Assistants, regulated by the College of Dental Surgeons of BC, to acquire the designation in expanded duties in Orthodontics. It is also an opportunity for Dental Hygienists, regulated by the College of Dental Hygienists of BC to gain formal advanced training in this area. An Orthodontic Module update for those who have previously successfully completed an accredited Orthodontic Module is also offered (registrants for the update will attend the lectures but not the clinical or exam portions of the module).
